ABSTRACT

The contribution of workers' remittances is due to as the home countries received the cash inflows from abroad. This regarding on the migrant remit to their home countries to support the families. The flow of money lead to affected the received countries. This paper employed a stepwise regression model to dig in how macroeconomic indicators correlate to workers' remittances in East Asia and Pacific countries (among developing countries) as the receipt. The result indicates the trend by the observations of 20 years, from 1990 to 2009.

ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious, the Most Merciful.

Alhamdulillah, all praises to ALLAH S.W.T in giving me strength, make it in ease and His blessing in completing this thesis.

My deepest gratitude goes to my family especially my beloved parents, for their prayers, encouragement and support.

To my supervisor, Dr. Imbarine Bujang, that hopefully can accept my precious work, special appreciation for the supervision and all the advices and guidance. All the comments and advice throughout this study helping me a lot to finish this thesis. Not forgotten, my appreciation also for Tuan Haji Sheikh Junaidi Sheikh Mohammad as my co-supervisor that sharing information in this research study.

Last but not least, sincere thanks to all my friends for their opinions and moral support. To those who indirectly contributed in this research, your kindness means a lot to me. Thank you very much.
