## ACKNOWLEDGEMENT

Completing this research was a challenging project for us. However, fortunately we had the help of many parties that made this project less difficult. Encik Mohd Zulhilmi kept us motivated and of course during all those moments things were not going as planned.

We would like to express our gratitude to our supervisor, Encik Mohd Zulhilmi bin Mohd Yunus who taught us many things about research and always give feedback on our work. We learn a valuable lesson about research in action. Things did not go as expected or planned. we must adjust, but these adjustments must be justified or qualified. Thank you for the support, patience, and ideas in assisting us with this project.

Our appreciation also goes to Dr. Nurul Hidayana binti Mohd Noor that guiding us throughout the semester. Finally, this thesis is dedicated to our family for the vision and determination to educate us. This piece of victory is dedicated to both of our parents. Alhamdulillah, we would like to thank God Almighty without whose blessings we will not have successfully completed this study.

## **ABSTRACT**

This purpose of this study was conducted to analyze the level of academic performance during COVID-19 pandemic. This study also to determine the factor that influencing academic performance of student during Covid-19 pandemic in UiTM Seremban 3. The factors observed to conduct this study were motivation of student, home environment and learning skills. This research was intended to explore the relationship of these three factors on student's academic performance. Many previous studies on this topic were conducted and found the Covid-19 pandemic had impacts on student's academic performance. To answer to the research question, quantitative method was used that obtained mainly from primary data which involved 357 of respondents from UiTM Seremban 3, Negeri Sembilan through online questionnaire. The result of this study found that all the three factor that mentioned above has a significant relationship with academic performance of student in UiTM Seremban 3. However, from the research findings, it was found that learning skills is the most contributing factor that influenced the academic performance of student.
