## ACKNOWLEDGEMENT

Alhamdulillah, we have completed this research project report as one of the requirements that need to be accomplished for **Applied Research (ADS555)** in this semester.

First and foremost, we would like to thank to our Faculty of Administrative Science and Policy Studies (FSPPP) at UiTM Seremban, Negeri Sembilan for giving us the opportunity to participate actively in this research proposal. Throughout in preparing this research proposal, we gained a lot of experiences, knowledge and exposure to several situations and challenges that we never faced previously, furthermore, it cannot be taught in any syllabus, and definitely this will be helpful in the future.

Secondly, it is our genuine intention to express a deep sense of gratitude and thanks to our competent lecturer, Puan Nur Ain Binti Yaacob who became our mentor and guide through the completion of our assignment that was given to us. Her dedication and keen interest in helping the best she could for her students truly motivated us to deliver and present the best that we could. Without her help, we won't be able to complete this research project. Her helpful advices and meticulous scrutiny helped us see the broader side on the topic we worked on, enabling us to further elaborate more in detail. Due to her remarkable ability to guide us, we are able to do the report from start to end without any hitch. We are truly indebted to our lecturer.

We would also like to thank our parents for giving us the moral support we need in the journey of this research project. Without their support, we would be less motivated and dispirited to finish all the research project requirement. Last but not least, we would also like to thank others involved, directly and indirectly, in the successful completion of this report.

## **ABSTRACT**

The goal of this study is to investigate the effect of time management towards the students' academic during online learning due to Covid-19 which involve time planning, time attitudes and time wastage variables. This research used a simple random sampling involving 357 students in UiTM Seremban 3. This research is intended to establish the vital relationship between independent variables and dependent variables. This study indicates that the time planning and time attitudes have an important relationship with student's academic performance. In this study, the survey approach students in UiTM Seremban 3 a questionnaire was used to provide the researcher with a successful insight into the issue. Therefore, the findings of this study demonstrate that every student must planning their time well especially during online learning to ensure they can perform in their academic performance. Moreover, the students must have good attitudes towards their times and avoid wastage time by doing unimportant things. This study concludes that the time planning and time attitudes affects the student's academic performance.
