in the Faculty of Applied Sciences  
Universiti Teknologi MARA**

**JANUARY 2013**

## ACKNOWLEDGEMENTS

Assamualaikum w.b.t

This research project would not have been possible without the support of many people. First of all, I would like to thank to Allah The Almighty for the blessing and strength rendered to me to complete my thesis.

Foremost, I would like to express my sincere gratitude to my supervisor Madam Junaiza Binti Ahmad Zaki for the continuous support of my research, for her patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my Degree study.

My sincere thanks also goes to co-supervisor Miss Hannani Binti Abdul Latif whose willingness to contribute their knowledge, time and effort till I had complete my final projects for guiding, reading and offering comment as the project involved. I gratefully acknowledge their helpful suggestion.

Besides my supervisor and co-supervisor, this gratitude also should be given to all lecturers and staffs in the Department of Furniture Industry Universiti Teknologi MARA especially Prof. Dr. Jamaludin Bin Kasim for his comments during the viva examination and give a lot of guidance during the proposal part.

I also would like to express my appreciation and thousands of thanks to my language coordinator, Miss Caroline Joseph for the guidance, advises and constructive criticism that has helped me in preparing this report.

Thanks you to all my friends for their cooperation either physically or mentally to make this project paper finish successfully. Without them, this project will become difficult and hard to finish in due date.

Last but not the least, I wish special gratitude to my beloved parents, Mr. Mohamed Said Suradi and Mrs. Faridah Jamian for their support throughout my study period in terms of money, guides and moral supports. Thanks once again to all the people who involved in this final project.

## **ABSTRACT**

### **MULTIPURPOSE CABINET USING KNOCKDOWN CONCEPT**

This research was conducted to examine the feedback from users about the important of multipurpose furniture using knockdown concept. The design of the product is the major for this study. The cabinet was produced and the data were collected by survey from questionnaires. The questionnaires were distributed to 60 correspondences from students and staff of UiTM Pahang. Then, the data were analyses by SPSS to get the results. Most of the correspondences given the positive feedback regarding on the materials used, knockdown concept, design is simple and suitable, easy to handle and portable, ergonomics and anthropometric, space saving, adjustable and multipurpose, commercialized product and attractiveness. Overall, the multipurpose cabinet using knockdown concept were accepted by all correspondences in range of age, gender and position.
