## ABSTRACT

Faraid is one of the Islamic property dividing techniques. This faraid happens when a family member has passed away and is eligible to inherit the property. This faraid is one of the most crucial things to keep in mind in order to ensure that the property distribution programme operates successfully. The purpose of this study was to determine the degree of *faraid* awareness among Muslims in Kuala Lipis, to identify factors that impact *faraid* awareness, and to come up with ways to raise *faraid* knowledge among Muslims in Kuala Lipis. The quantitative technique was employed to finish this work. This strategy is utilised to meet all of the study's objectives as effectively as feasible. The majority of the respondents are aware of *Faraid*, hence the outcomes of this survey are encouraging. However, some people are still unaware of their surroundings.

## ACKNOWLEDGEMENT

First and foremost, I would want to express my gratitude to Allah SWT for providing me with the chance to pursue my Diploma and for successfully finishing this long and challenging path. I'd also like to thank my parents for always being there for me and for motivating me to finish this project. I owe a lot of gratitude to Dr. Wan Nor Hazlina Binti Wan Jusoh, my supervisor. Thank you for all of your aid, patience, and suggestions, as well as for assisting me in completing this assignment. Not to mention all of the people who took the time to react to the inquiry.

My gratitude also extends to my friends, who assisted me in the event of a misunderstanding over the project. Not to mention my groupmate, who never tired in assisting one another.

Finally, this project has provided me with priceless memories. This is because there are both bitter and good memories in this project. All of my academic accomplishments will be given to both of my parents. Alhamdulillah
