ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious and The Most Merciful. Alhamdulillah, praise to be Allah for His Mercy and Guidance, we are able to complete this research report.

Firstly, we would like to express our gratitude to beloved family. We were incredibly lucky to have their encouragement and motivation throughout the process of completing our report.

Special thanks and respect to our supervisor, sir Shahril Eashak for providing all support and guidance which made we complete on time. We learn lots of valuable lesson regarding the final year project.

Last but not least, we would want to express sincere appreciation to our friends for their unwavering support and willingness to spend time with us. Without the efforts and cooperation of all those concerned, completing this research report might be challenging for us.

ABSTRACT

For this purpose, a survey is conducted with 342 of students Faculty of Administrative Science and Policy Studies (FSPPP) in order to determine the level of employability skills among FSPPP student in UiTM Seremban, the significant differences between perception if employability skills based on gender and examine relationship between career maturity and Online Distance Learning (ODL) towards employability skills. The hypothesis was then proposed and tested using Pearson Correlation. The analysis revealed the majority of the students have a high level of employability skills among FSPPP students in UiTM Seremban because the mean is 3.9755. Next, there are no significant difference values between the perception of employability skills and gender as the p -value $0.716 > 0.05$. Lastly, there is positive relationship between the career maturity of students and the influence of the ODL ($r = 0.599^{**}$, p -value = 0.000, $p < 0.05$).

Keywords: Employability skills, Career maturity, Online Distance Learning, Higher Education, Student
