Puan Hajah Wan Hasni Wan Hassan,  
Research Advisor,  
Faculty of Business and Management,  
MARA University of Technology, Kelantan Branch,  
Kelantan Darul Naim.

Dear Madam,

**SUBMISSION OF RESEARCH REPORT**

Here I enclosed the industrial attachment research's report entitled "The Students' Awareness and Interest in Learning Information Technology". This report will lead to some finding analysis and recommendation to be considered for the secondary school's students in Kota Bharu area.

I hope this report meet your requirement and achieve its desired objectives.

Thank You,

Yours sincerely,

ARIZAN YUSOFF

98000029

## ACKNOWLEDGEMENT

I would like to express my profound gratitude and special thanks to my research adviser, Puan Hajah Wan Hasni Wan Hassan for her guidance, advice as well as suggestion given throughout this project.

Special thanks to Encik Fikri Abd. Rahim (General Manager) and Encik Azman Yaman (Operational Manager) from the Inter Active Trading and Service that made it possible to pursue my research on "Students' Awareness of and Interest in Learning Information Technology (IT)". Not to forget, my appreciation goes to the secondary schools' principals, number of respondents and also to those who are directly or indirectly contributed to materialize this research.

Finally, I hope this project can be continued in future in order to expose the students to a real business world.

Wassalam

Thank You

Arizan bin Yusoff

## **ABSTRACT**

The revolution of information technology bring the great impact on our educational system simultaneously change everyone perspectives about the importance of computer technology in today's world.

In short period of time, Information Technology provides a new space to communicate, and at the same time becomes the epicenter for information. The uses of information technology canceroulsy spread among the student thus make the knowledge of information technology crucially important for everybody.

To live in new millenium means to know about information technology. Those who know nothing about information technology will left behind. In this competitive edge, every one is rushing to be the best. More we know about information technology better the chances for us to be the best.

Realizing that information technology play the major role to shape the world, this project paper tries to discover the "awareness level" among the student about information technology. Last but not least, this project paper hopefully will help the student to realize the important of information technology in student's learning process.

## 1.0 INTRODUCTION

Malaysia has moved towards a new era whereby she has to determine her capability, her strengths and weaknesses, her limits and boundaries in the challenging industry of Information Technology (IT).

*“ The third revolution in human history, brought a great changes to the world. The revolution that I mean here was Information Revolution and the Information Technology (IT) act as a leader to this revolution”.*

(Dato' Seri Dr. Mahathir Mohamad, 11<sup>th</sup> October 1997, Information Technology Campaign).

Studies have shown the paradigm shift in the use of computer technology in Malaysia. We now, are geared towards being technologically able society to be together with the rest of the world in this digital age.

Nowadays, the use of computer and Internet in education, become a natural phenomenon towards the new millenium. A rapid growth of digital development in Information Technology (IT) since 90's would effect to large changes in Malaysian education.

It also helps the government in order to aim and encourage publics to be more aware on Information Technology, suitable with the existence of high technology project, Multi-Media Super Corridor (MSC) which was launched on 1<sup>st</sup> August 1997 by Dato' Seri Mahathir Mohamad.<sup>1</sup>
