## FOLDABLE PRAYER MATS

AL KAREEM (PRODUCT DESIGN)

Design Advisor : MR MUHAMAD AIMAN AFIQ MOHD NOOR

Coronavirus disease 2019 (COVID-19) is a highly contagious viral illness caused by severe acute respiratory syndrome SARS-cov-2. It has had a devastating effect on the world's demographics resulting in more than 5.3 million deaths worldwide. It has emerged as the most consequential global health crisis since the era of the influenza pandemic of 1918.

This product is one of the existing prayer mat and the idea taken from the humidifier . The reason why, existing prayer mats do not have a sanitizer and are not able to be used for travel because of size . This product is also to be used as a product that can maintain health and hygiene to the public to avoid covid-19. The previous use of the humidifier was for one use only and did not have more than that but this product is widely used by people because it has interesting parts to be used for travel and sanitization. I do this product because it is so helpful in terms of health and hygiene. This product is used for travel and at mosques for prayers and sanitizer after use . It is also to ensure that each prayer mat can be kept clean. Therefore, this product will probably give a nice side effect to ensure that the covid-19 virus will not spread quickly.

With this new product, the public is able to reduce the risk of covid-19 virus and also this product is very effective to all. Obviously, this product will be able to help us to ensure the cleanliness of a prayer mat can be maintained and all the diseases are not infected easily and quickly. Therefore, it is also designed with good use to ensure the prayer mat will be cleaned with sanitizer after using . It also has a place to hold anywhere more comfortably and easily .
