ACKNOWLEDGEMENT

The completion of this project paper would not have been successful without the support, assistance and contribution of many individuals. First and foremost, I would like to extend my sincere appreciation and special gratitude to my Advisor, Encik Marsus Jabar for his continuous guidance and encouragement towards the completion of this research project. His precious and constructive comments, broad views, ideas and willingness to answer related problems that geared me to embark this particular project paper.

I would like also to express my special thanks to the staffs of Sabah Lands and Surveys Department in Kota Kinabalu for their full co-operation and assistance in providing me all the necessary data and information.

Lastly, I would like to extend my special thanks and utmost appreciation to my ex-Lecturers and classmates for their valuable supports and advices in preparing this project paper. To my beloved husband, Marzuan and my three children, Mikael, Maliki and Myra thank you so much for the understanding, support and for giving me the courage that I needed when I am in dire straits in completing this thesis. I love you all.

ABSTRACT

Information Technology (IT) has changed the way the private and public sectors conduct their business operations. Reduced costs and simplified processes are but simply some of the benefits being reaped by through improve technology usage.

Malaysian government has identified initiatives to implement the modernization of the public sector. MSC is Malaysia's initiative for the global information and communication technology (ICT) industry. The e-Government initiative was launched in Malaysia in the year 1997 as one of the seven flagships of the Multimedia Super Corridor (MSC) initiative.

e-Cukai is used to collect quit rent or assessment through online payment. The main objective of e-Cukai is to improve Sabah Lands and Surveys services and operation with the end view of fulfilling customer needs. With this method, the department's customers can make payment through online and this will cut their waiting time by queuing at the department's counters. Online payment is expected to improve the department collections of quit rent that have been outstanding for many years.

The study reveals, however, the implementation of e-Cukai online payment in 2006 does not show a lot of improvement in collecting quit rent. There are two main reasons for this poor performance: Awareness or rather lack of awareness among the respondents is the main reason. No proper training provided by the department and lack of confidence towards the system, are among the main reasons. Attitude of the staffs is also one of the main reasons why the respondents are not using the service. The department has to consider the recommendations made in this study.
