# background of RESEARCH, INDUSTRIAL LINKAGES & ALUMNI

## Objectives

- To promote world-class research.
- To administer, coordinate and provide service for research development, consultation and research publication.
- To provide assistance in exploring new subjects and identify niche area of interest.
- To disseminate information and provide ample training in research, consultation and publication of research.
- To ensure innovation, quality research, consultation and publication are maintained.
- To assist in research publication for high impact journals.

## Vision

To become the leading administrative centre for research, development, consultation and world-class research publication.

## Mision

To enrich the academia, creative ability and innovation through quality service.

Division of Research, Industrial Linkages and Alumni or known as PJI&A started as the Research Management Unit (RMU) or IRDC and was formerly known as Planning, Research and Development Centre which was established in April 1980. However in September 1987, IRDC was restructured with its heightened importance in research and consultation in UiTM and was divided into two units, Research and Consultancy Centre (RACC) and Planning and Evaluation Unit. This centre was then renamed to Research and Consultancy Bureau in 1994 and went through another name change to become Institute of Research, Development and Commercialisation (IRDC) on 15 July 2003.

With the mooted of the post of Deputy Vice Chancellor in March 2008 to take over the intellectual property and commercialisation portfolio, IRDC was given the responsibility to maximise innovation and increase the number of research which will later be published in high impact journals. Ensuing this, on 31 July 2008 IRDC was changed to Research Management Institute (RMI) to synchronise with UiTM's aspiration to become a Research University that will develop innovation activities and new research. It was only in 2011, that RMI became the Research, Industrial Linkages and Alumni Division (PJI&A), headed by its Deputy Rector, Associate Professor Dr. Roaimah Omar. Under her tutelage, Invention, Innovation and Design (IID) was born in 2009.

The different divisions or units in PJI&A are responsible to manage, monitor and conduct research in science and technology, management and social sciences, consultation, financial assistance for consultation, innovation, publication and Information for Research and Consultancy (INFORAC). PJI&A also conducts seminars, workshops and roadshows to encourage, motivate and train the academic and non-academic staffs in research and consultation, securing research grants and projects, to manage good financing and publish research in a responsible and ethical manner.

# RIID2013 OBJECTIVES

## General Objective

To display research, invention, and design from various institutions (IPTA/IPTS) that can be commercialised for global benefit

To culturalise research and innovation through the sharing of expertise and commercialised, creative and innovative ideas

To instill interest and encouragement to the public towards research, invention and innovation that poses as a medium for the nation's development.

## Specific Objective

To identify and promote new and inventive discoveries that are commercialised, creative, and innovative from various institutions (IPTA/IPTS) all over Malaysia.

To select discoveries and new invention to be contested in the national and international level.

To uphold the reputation and image of UiTM as a well-known pioneer in innovation and invention in the national and international level.

## CHIEF MINISTER MELAKA

**YAB Datuk Seri Ir. Haji Idris Haron**

*Chief Minister Melaka  
December 2013*

*Assalamualaikum wbk and  
best greetings Salam 1Malaysia,*

And foremost, I would like to congratulate Research, Industrial  
Parks and Alumni Centre (PIAC), Universiti Teknologi MARA  
(UiTM) Melaka for yet another successful organisation of this  
rich, Invention, Innovation and Design Exhibition 2013 (RIID

In the era of globalisation, the Malaysian government is stepping  
up its efforts in developing the country and its people, be  
ing by launching a holistic socioeconomic development programme.  
Our Prime Minister Datuk Seri Mohd Najib Tun Abdul Razak  
has introduced a massive transformation agenda in implementing the  
programme with its approach and philosophy. The Prime Minister has  
also outlined five-key strategic thrusts under the 10th Malaysia  
Plan (10MP) to enable Malaysia to become a high-income and  
developed nation by 2020.

Therefore, the National Key Results Area (NKRA) and the Key  
Performance Index (KPI) were introduced towards achieving vision  
2020. While moving towards achieving a developed country status,  
Malaysia needs to draw up a new approach which emphasises on  
quality human capital, innovation and creativity. The government in  
addition has to operate as competitive corporation.

I would like to congratulate UiTM Melaka for supporting the  
country's vision by hosting RIID2013 competition and exhibition.  
With its theme Innovation for Sustainable Growth, this event is a  
positive initiative to encourage professionals and academicians  
alike to enhance their knowledge and practical skills and these are  
parts of their contribution for the nation's building.

When research activities are conducted continuously, it is expected  
that more innovations will be generated. UiTM Melaka's initiative  
is highly commendable as it manages to attract 340 products to  
be displayed and competed at this event. It is hoped that this event  
will serve as a catalyst in enhancing the roles of professionals in  
various industries.

***Assalamualaikum wbkt, Salam 1Malaysia  
and Salam UiTM Sentiasa Di Hatiku.,***

I would like to welcome our honourable guests, professionals, and academicians from schools, colleges and universities to the 5th Research, Invention, Innovation and Design 2013 (RIID 2013) competition proudly organised by the Research, Industry Linkage and Alumni Division (PJI A) Centre Universiti Teknologi MARA (UiTM) Melaka.

In line with the government's aspiration to nurture and cultivate innovation, UiTM Melaka has taken the initiative to organise RIID 2013 Melaka Innovation Festival. One of the main objectives of the event is to raise the status of local universities globally. To achieve the status of a Research University (RU), one of the criteria is to emphasise on high impact innovation research which leads to invention of new business models, or innovative processes. This would result in an improved efficiency of the organisation and contributes towards better quality of life.

Since innovation is a vital catalyst to attain the status of developed nation in the year 2020, UiTM Melaka is heading the nation's call to attain aspiration through innovative programmes with staff and students. These creative and innovative abilities could be brought to greater heights through competitions and innovation exhibitions held annually. During this two-day event, a talk on innovation will also be held. Innovation is one of the key factors that could push the economy forward. In line with the strategic thrusts, the RIID 2013 competition will serve as a platform for researchers to expand their researches into innovations while becoming a venue for them to showcase their products, prototypes and new ideas.

This competition also serves as a platform for students, lecturer's administrative officers and the public to demonstrate their products or prototypes as well as sharing new ideas for commercial value. Therefore, PJI A decided the Optimizing Innovation for Global Commercialization as our theme for this year 5th Research, Invention, Innovation and Design 2013.

I am proud to announce that the number of participants in this event has increased to more than 300 participants compared to the previous year event. I would like to extend my sincere thanks and gratitude to the committee members who have persistently given their full commitment to this event.

I wish all the participants all the best in the competition.

Universiti Teknologi MARA Melaka  
December 2013*

foreword by  
**DIRECTOR OF  
 AKEPT**

**Prof. Dr. Mohd Majid Konting**

*Director  
 Higher Education on Leadership Academy (AKEPT)  
 December 2013*

***Assalamualaikum wbkt and Salam 1Malaysia***

First of all, I would like to congratulate the Research, Industry Linkage and Alumni Division (PJIA) Centre Universiti Teknologi MARA (UiTM) Melaka for yet another successful organisation of the Research, Invention, Innovation and Design Exhibition 2013 (RIID 2013).

This competition and exhibition is the fifth effort by the Research, Industrial Linkages and Alumni Centre in exhibiting the outcomes of research, invention and innovation by our versatile lecturers and students. It's encouraging to see that the competition has also attracted participation from other IPTAs, IPTS and schools. I believe this exhibition is definitely a good avenue for them to participate actively and progress collaboratively in the field of innovation and research. I am confident that the PJIA UiTM Melaka will continue to address the various challenges that we are constantly facing with a view towards multidisciplinary solutions. This year's theme of Innovation for Sustainable Growth is appropriate timely and I am certain that this exhibition will bring about more collaborative research and publication.

I therefore would like to take this opportunity to extend a big 'Thank You' to the RIID 2013 organising committees and those who have contributed directly or indirectly in making this exhibition a big success. I wish all researchers, lecturers and students a meaningful and enriching experience in coming up with new and innovative inventions. I wish to end with a note of thanks to the Research, Industrial Linkages and Alumni Centre for a job well done.

## Komunikay

Mohamad Razeef Shah Mohmad Rafik; Syed Muhammad Nuh Bin Syed Ahmad; Muhammad Alyas Abul Jalil; Mohd Syahid Rushdan Mohd Sabri; Muhammad Zul Fikri Zulkafli; Muhammad Izzat Ghazali; Nur Syafiqah Binti Nordin

*Universiti Teknologi MARA Shah Alam*

Komunikay is an application (App.), which in essence is a combination of five different elements into one, i.e. information assessing and gathering, social media, navigation, education and a game play interface. By combining these, you have a platform where information is no longer a dull thing to acquire, and it is also communicative, interactive, simple, fun and easily accessible for both staff and students of UiTM. Komunikay App., acts as a virtual friend to staff and students to gateway of information, whereby communication is no more a barrier but it is accessible at any time, any location. Not only that, the Komunikay App., acts as a useful teaching and learning tool, where students and lecturers will be able to communicate and sign in into class virtually. Since UiTM is heading into the virtual world where blended learning will be implemented, it is essential for every student to learn and gain knowledge. Students will be able to access the learning tools and notes and also podcast and audiocast for each lecture according to lesson plans and weekly plans. For its navigation system, it contains a detailed map off everything that is included in the campus, accessible in a gameplay interface, or also using the GPS system to pinpoint your location and lead you to where you wish to go. Komunikay is a new all in one platform for every level of people in UiTM as the university is heading towards virtual world.

## Kecekapan Tenaga: Penggunaan dinamo untuk menjana elektrik bagi mengecas alat-alat elektronik mudah alih

Mohd Azri Fahmy Bin Hj Azman; Ng Yong Sheng; Leong Shi Rong

*Institut Latihan Perindustrian, Pasir Gudang, Johor*

Dalam keadaan alam sekitar pada hari ini, terdapat lebih usaha dan lebih banyak minat yang diambil para penyelidik untuk mencari sumber tenaga alternatif bekalan kuasa. Tujuan projek ini adalah untuk mereka bentuk dan membina sebuah pengecas mudah alih untuk telefon mudah alih yang akan dapat mengatasi kuasa bateri dalam telefon mudah alih terutama semasa kecemasan. Ia akan mengatasi had konvensional pengecas telefon mudah alih yang memerlukan soket suis 240V AC sebagai sumber tenaga elektrik untuk mengecas bateri telefon bimbit, yang hanya boleh didapati di rumah atau premis lain. Penggunaan dinamo tenaga mekanikal dipilih sebagai cara alternatif untuk mendapatkan tenaga elektrik untuk mengecas bateri telefon bimbit. Oleh itu, telefon mudah alih boleh dicaj di mana-mana sahaja tanpa perlu untuk menggunakan soket suis 240V AC. Projek ini melibatkan komponen elektronik sepenuhnya. Gabungan litar dari penukar AC ke DC, litar pengatur DC digunakan untuk menerima sekurang-kurangnya keluaran 5V daripada dinamo dan juga mampu menukar ke voltan keluaran yang lebih tinggi untuk dikenakan kepada bateri telefon bimbit sekiranya diperlukan. Projek ini melibatkan bentuk skala yang lebih kecil sistem caj telefon bimbit yang dikuasakan melalui dinamo yang dipasang pada basikal dan ia mampu mengecas pelbagai bimbit telefon secara serentak.
