Associate Professor Dr Shukor Sanim as Guest Speaker for 2021 Fall Colloquium, Temple University, Philadelphia

📅 29/11/2021 (<https://news.uitm.edu.my/associate-professor-dr-shukor-sanim-as-guest-speaker-for-2021-fall-colloquium-temple-university-philadelphia/>) 👤 Dr Razlina Razali (<https://news.uitm.edu.my/author/admin/>)

Fall 2021 Colloquium
 Department of Computer and Information Sciences

***Mining Software Repository to Investigate Socio-Technical
 Congruence in Software Engineering Projects***

Dr. Shukor Sanim Mohd Fauzi
 Associate Professor
 Faculty of Computer and Mathematical Sciences
 Universiti Teknologi MARA
 Perlis Branch, Malaysia

Wednesday, October 6th, 10 AM

Abstract: Software development has evolved to become more complex and distributed. This highlights the importance of coordination between developers, which is known to impact development performance. Measuring developer coordination is complex but being able to understand its role in software engineering projects requires an accepted way of measuring it. One approach used to conceptualize and measure coordination is known as 'Socio-Technical Congruence' (STC), which is the fit between required coordination and actual coordination measured as the proportion of actual coordination activities that occurred relative to the number of coordination activities that should have taken place (that is, required coordination). Research to-date suggests that STC is a useful predictor of development task performance in software projects. This talk exposes the audience on the basic concepts of STC and also will discuss the impact of STC in software engineering projects.

Bio: Shukor Sanim Mohd Fauzi is a Deputy Rector (Research and Industrial Linkage) at UiTM Perlis Branch, and also a faculty member of Faculty of Computer and Mathematical Sciences, Universiti Teknologi MARA, Perlis Branch, Malaysia. Previously, he has held Visiting Fellow position at Universitas Airlangga, and Visiting Researcher position at Universitas Islam Riau. He obtained his PhD in Software Engineering from the University of New South Wales (UNSW), Australia. His area of specialization includes software engineering, empirical software engineering, mining software repository, social network analysis, socio-technical congruence, computer supportive collaborative work, and software process. He has received more than 16 research grants (internal and external grants) totaling more than RM1,500,000. He has published more than 130 scientific publications and has won more than 60 medals at national and international exhibition. He also is the editor for 5 books including "Software Process Improvement and Management: Approaches and Tools for Practical Development". He received several recognitions from national and international institutions, including Anugerah Tokoh Berpotensi 2020 (Distinguished Academician Award), Anugerah Jaringan Antarabangsa 2020 (International Linkages Award 2020), Anugerah Penerbitan Jurnal Berindeks 2020 (Indexed Journal Publication Award 2020), Anugerah Penulis Prolifik (Sains dan Teknologi) 2020 (Most Prolific Author Award - Science and Technology 2020), etc. He actively participated in many international conferences as a reviewer and Technical Programme Committee, and also a reviewer for national and international journals. He involved in many professional activities including Technical Committee Software Engineering for Standard and Industrial Research Institute of Malaysia (SIRIM), Malaysia Software Engineering Interest Group (MySEIG) and, Big Data Malaysia Group, and also is a Chairman of Northern Region Big Data Research Group. More of his information can be found on his website: <https://sites.google.com/site/ssmfonlineportfolio/in-person>

Arau, October 6, 2021 – The Deputy Rector of Division of Research, Industry, Community, Alumni, Entrepreneurship and Network (RICAEN), Universiti Teknologi MARA Perlis Branch, Associate Professor Dr Shukor Sanim Mohd Fauzi was appointed as a guest speaker at Temple University, Philadelphia, USA. Temple University is a public state-related research university which was founded in 1884. At present, the university houses 17 schools and college including Fox School of Business, College of Science and Technology, School of Education and Human Development, School of Podiatric Medicine, School of Sport, Tourism and Hospitality Management and Boyer College of Music and Dance.

Dr Shukor Sanim who is an Associate Professor in the Faculty of Computer and Mathematical Sciences honoured the invitation as a guest speaker for the 2021 Fall Colloquium. The online colloquium was organised by the Computer and Sciences Department, College of Science and Technology, Temple University.

At the event, Associate Professor Dr Shukor Sanim, whose expertise includes software engineering, empirical software engineering, mining software repository, and software process delivered a lecture titled 'Mining Software Repository to Investigate Socio-Technical Congruence in Software Engineering Projects'. During the lecture, he discussed with audience the basic concepts of Socio-Technical Congruence (STC) and the impact of STC in software engineering projects. STC is one of the approaches to conceptualise and measure coordination in software development. Recent literature posits that STC is a useful predictor of development task performance in software projects.

The one-hour lecture was not only attended by academics and students of the university, but it also captured the interest of researchers and members of the public who were interested in the latest development in software engineering. Also present at the event was the Director of the Center for Networked Computing, College of Science and Technology, Temple University, Professor Dr Jie Wu. At the end of the event, Associate Professor Shukor Sanim and Professor Dr Jie Wu discussed future directions for research and collaboration between Universiti Teknologi MARA and Temple University.

Associate Professor Dr Shukor Sanim obtained his Ph.D in software engineering from University of New South Wales (UNSW), Australia. He has received several recognitions from local and international institutions including Anugerah Tokoh Berpotensi 2020, Anugerah Jaringan Antarabangsa 2020, Anugerah Penerbitan Jurnal Berindeks 2020, and Anugerah Penulis Prolifik (Sains dan Teknologi) 2020. Associate Professor Dr Shukor Sanim is the newly-appointed Rector of UiTM Perlis, succeeding Professor Dr Haji Khudzir Haji Ismail who ended his service as Rector on November 22, 2021.
