ACKNOWLEDGEMENT

First and foremost, I would like to express my utmost gratitude to Allah S.W.T due to the accomplishment of this Final Year Project entitled Profitability of Malaysia Service-Based Industry as one of the requirements in the course work assessment for the code MGT666. Alhamdulillah, I managed to finish it upon His guidance and blessing successfully.

Special thanks to my Industrial Coordinator Dr. Nurul Labanihuda and the advisor Miss Rozihanim for providing continuous support for the whole semester upon completing this report. We are constantly being updated with helpful information to ensure smooth progress for the task given. Without his guidance, I will not manage to finish this report.

Moreover, I am so grateful to my parent and family, who gave me endless support during the completion of this final year project. They encourage me from the beginning of the semester until the final day of finishing this final year project. I will never forget that all of my friends who also keep on motivated me and the non-stop knowledge sharing throughout the semester.

Last but not least, I would like to thanks those who were involved and contribute directly and indirectly to this project. All the knowledge and effort shown in various ways for helping me are genuinely appreciated.
