ACKNOWLEDGEMENTS

A project such as this research paper can be finished as an individual effort. The assistance of many individuals was mostly helpful in the progress of this research paper. I would like to express my thankfulness to those who support was necessary to the completion of this research paper.

First, I would like to give my sincerely thanks to Mr. Syamsyul Samsudin and Professor Dr. Haji Omar Samat for their kind support related to my research study. With their support, guidance and cooperation I was able to fully concentrate on completing my research paper. Firstly, I would like to express my thankfulness to Mr. Syamsyul Samsudin, my principal supervisor. He provided me with timely supervision and advice to generate this research paper, edit various drafts of my research paper and gave valuable suggestions. He not only provided guidance from his knowledge and experiences in the field of investment to my study but he also continually motivated me to persevere with the research paper and displayed excessive levels of patience especially with my timely difficulties. I am extremely grateful to Mr. Syamsyul Samsudin for his great kindness in supporting me in my study.

I am sincerely blessed to Professor Dr. Haji Omar Samat. I tremendously benefitted from his expert knowledge in the area of financial engineering. His guidance with the modelling is gratefully appreciated.

I would like to thank Mr. Kamal Fahrulrazy Rahim for his kindness and for being helpful me by teaching me quantitative research method.

I would like to record my appreciation to my fellow classmates and friends in Uitm Segamat. They have always supported me with encouragements to continue with my study.

I would like to pay my gratitude to my father and my mother. Both of them always pushed me to study at this level, even though my father not really in good health but he still working hard to provide comfortable life for me and my family. My family always supported me to continue with my studies. I am eternally grateful for this kindness.

Special thanks against should go to Mr. Syamsyul Samsudin who contributed in numerous ways for me to complete this thesis. Without his encouragement, tolerance and patience, my thesis could not have been completed.

Finally, I would like to express my gratitude and the highest level of respect for my father (Mr. Othman Bin Abd Ghani) and my mother (Madam Tuminah Binti Shamshuddin). They supported me with my education and taught me the virtues of patience. They understood my difficulties with my studies and continued to provide me emotional support.

I dedicate this thesis to my parents.

ABSTRACT

The Malaysian stock market is a typical emerging market with special features that are very different from those of mature markets. The objective of this study is to investigate whether and how these features affect the volatility-volume relation for Malaysian stocks. This paper examines the roles of money supply (M2), Consumer Price Index (CPI), Industrial Production (IP), and interest rate (IR) from January 2001 until January 2015 in explaining the volatility-volume relation in the Kuala Lumpur Composite Index. These variables contain monthly data of 169 samples of observation. The aim of this paper is to determine which variables are the most significant in influencing the stock market. The findings reveal that among four of the independent variables, only three variables which are Consumer Price index, interest rate and industrial production are significant with dependent variables (KLCI). In addition, Consumer Price Index, and interest rate have negative relationship with stock price. However, positive relationship is shown between Industrial Production and stock price. The most significant variable is Interest Rate compare to Consumer Price Index and Industrial Production. The results may have important implications for work explaining the volatility-volume relation on the Malaysian stock market, further providing a reference by which to regulate emerging markets. This study also pointed out several conclusions and recommendations for future research.

Keywords: Kuala Lumpur Composite Index (KLCI), Money Supply (M2), Consumer Price Index (CPI), Interest Rate (IR), Industrial Production (IP).

TABLE OF CONTENTS

ACKNOWLEDGEMENTS	
ABSTRACT	
CHAPTER 1: INTRODUCTION	
1.0 Introduction.....	6
1.1 Background of study.....	7
1.2 Problem statement.....	10
1.3 Research objective.....	12
1.4 Research question.....	13
1.5 Significance of study.....	14
1.6 Scope of study.....	16
1.7 Organization of the study.....	16
1.8 Limitation of study.....	17
CHAPTER 2: LITERATURE REVIEW	
2.0 Introduction.....	18
2.1 Literature review on Malaysian Stock Price Volatility present by KLCI.....	18
2.2 Literature Review on Money Supply (M2).....	21
2.3 Literature Review on Consumer Price Index (CPI).....	22
2.4 Literature Review on Interest Rate (IR).....	23
2.5 Literature Review on Industrial Production (IP).....	24
CHAPTER 3: RESEARCH METHODOLOGY	
3.0 Introduction.....	25
3.1 Sample and Data.....	26
3.1.1 Population and Sample.....	26
3.1.2 Data collection.....	27
3.1.3 Research variable.....	29
3.1.3.1 Dependent variables.....	29
3.1.3.2 Independent variables.....	29
3.2 Theoretical Framework.....	30
3.3 Hypothesis Development.....	31
3.4 Statistic and Econometric Method.....	32
3.4.1 Descriptive Analysis.....	32
3.4.2 Test for Stationary: Unit Root Test.....	32
