ACKNOWLEDGEMENT

I would like to express my thankful and grateful for Allah S.W.T because with the permission, I have successfully finished up my research. There are many people are involved to complete and finished this research. I would like to acknowledge at least some of them.

First of all, I want to give specials thanks to Miss Noryana, as my supervisor, of the kindnesses and encourages.

Finally, I also want to give thanks to my lovely parents whose are always gave me supports to done this work. Furthermore, I want to give credits to my beloved friends whose always help me and gave an idea for me to done successfully and completely this assignment, either direct or indirect to finish this assignment. I am very appreciating to your good deeds, thank you very much.

ABSTRACT

Index is a guide to the contents of a knowledge record. It is a systematic analysis of such records, arranged in an organized way. A list bibliographic information arranged in order according to some specified datum such as author, subjects or topic keyword (Cleveland, 2001). The purpose of this study is to know the relationship between awareness, need and library performance with usage of index among students. This study was conducted among UiTM Kedah students. Questionnaire has been used as the instrument and methodology in gathering the data from respondents. Researcher was used Statistical Packaging for the Social Science (SPSS) version 18.0 to analyzed the data collected. The finding of this study is there are no relationship between awareness, need and library performance with usage of index among students.

Keywords: *index, usage of index, awareness, need, library performance, searching tool.*
