ACKNOWLEDGEMENTS

First of all, I would like to say Alhamdulillah, praises to Allah S.w.t for his blessings throughout the ups and down in completing my study successfully.

I would like to say very thank you to my research supervisor, Dr Hapsah S Mohammad for giving me this opportunity to do this research, give positive criticism together with good advice, suggestion and option while doing this research. She has taught me many new things on how to make the research paper completely. Not forgotten to my co-supervisor, Madam Flicia Rimin for her support throughout the research.

I am so blessed to have both of my beloved parents and sibling, Amat Bin Kawoh@Abd Rahman, Sitti Rahmah Binti Sapar and all of my siblings for their support in term of moral, physical and financial while completing this research

Finally, I would like to thank all the people who helped me in order to do this research, while they are also busy completing theirs too. Thank you so much.

ABSTRACT

This study aim to examine the “Bank Efficiencies and Non-Performing Loan: An analysis into Domestic Banks and Foreign Banks in Malaysia”. This study used panel data regression From 7 Domestic Banks and 8 Foreign Banks listed bank in Bank Negara Malaysia. The period for data collection are started from year 2014 until 2018. The dependent variable in this study is Non-performing loan as the credit risk. Meanwhile the independent variable is ROA and BS. The findings for Domestic Banks in Malaysia showed that, NPL and ROA have a significant positive relationship. While, NPL and BS have negative relationship. For Foreign Bank in Malaysia, ROA and NPL have a positive relationship. Whereby, BS and NPL has a significant positive relationship.
