## **ABSTRACT**

The job satisfaction often views as negative emotional reaction of individual to work related stress. Each worker has the possibility to face with those elements at their workplace an office. Therefore, this correlation research design had focus on the relationship between the office ergonomic element and job satisfaction among UiTM Pahang office staff. The element of the office ergonomics includes office environment, chair, keyboard, monitor, additional equipment and working position. The total of questionnaire is 113 and 68 work receive and this is equivalent to 60.17% of the respond rate. Mean value for job satisfaction is (3.72). Mean value for office ergonomics element office environment (3.27), chair (3.47), keyboard (2.91), monitor (3.57), additional equipment (3.68) and working position (3.47). From the findings, the respondent absolutely does not agree that they faced with the problem of job satisfaction at their workplace. Gender also did not give any relationship and references of the level reaction. The recommendation also stated to practice office ergonomics within the organization and at the same time increase the level of job satisfaction among UiTM Pahang office staff.

## ACKNOWLEDGEMENT

Bismillahirrahmanirrahim,

Thanks to God for giving us this opportunity and patient to complete this project successfully and also to present this complete report that will give information and benefit. We also would like to express our sincere thanks to our supervisor, En Mohd Zulkifli bin Abdullah for the support, guidance, and encouragement over the last few years. Your willingness to allow us make this projects make us fulfil a dream, and for this we are extremely grateful.

We would like to thank to Tuan Haji Abd. Razak Bin Said for his support and input that is included in this thesis during the class time. Special thanks and much love to our parents for their sacrifices they have made to send us to university and to our family who have supported us so much along the way. Without that foundation of support, this goal could never have been achieved.

We also would like to express our gratitude to all friends and people around us who give us a very valuable help, assistance and advice along the accomplishment of this project. All of the cooperation is very much appreciated. Every single deed that anyone contributed in this project is appreciated even though it is only a small helps. Before that, we want to apologize if there were any weaknesses and wrong doing while completing the project.
