## ACKNOWLEDGEMENT

**ALHAMDULILLAH**, I would like to praise Allah S.W.T for giving His blessings to me during the completion of my thesis. Without His blessings, I would not be able to complete it in a given time. Also, this work could not have been possible without constant professional guidance, encouragement and supports from my respectful thesis advisor, Madam Siti Zaitun Binti Saddam all along the way. She has patiently spent time to motivate me and had enlightened me the right way of completing a successful thesis project. She has made my heart felt proud of my learning in this final work, the most in my third years Degree studies.

This performance would never have come to this point without the manager and other staffs of Shahinuddin & Ranjit Solicitors and Advocates, whose input in terms of time, energy and professionalism has all been incredible. I would like to extend my appreciation to Khairulnizam Bin Omar who has served as my special supervisor and definitely spent hours to help and guide me along the way during my internship at Shahinuddin & Ranjit Solicitors and Advocates. My internship would not have been possible without the sincere, personal and professional support of many people in Shahinuddin & Ranjit Solicitors and Advocates, especially for department team members. I want to say a lot of thank you to Khairina binti Kator who helped me by giving much information about account and finance in a workplace. I would also want to send my deepest gratitude to my respondents who patiently answered my questionnaires and give positive responds towards my study. Without them, the data cannot be collected and analyzed further in this study. Last but not least, I want to send my special loving thanks to my family and friends for their unconditional love and delights during the project time. With encouragement and love from anyone of my colleagues, friends and families, I would not have been able to get to where I am now. I will forever value the support and kindness that each of them shared in my accomplishment.

## **ABSTRACT**

This project paper entitled “Employability Skills among Business Graduate from Employers’ Perspective” was conducted from July 2013 until December 2013. The main aim of this study was to identify the perception of employer’s concerning the employability skills needed by business graduate in job market. Four variables which are communication skills, personal quality, teamwork skills and intellectual/academic skills that make up employability skills based on past research were examined in this study. How employers were viewing the employability skills needed by business graduate in job market; which skills were relatively stronger; and the most important employability skills chose by employers were the questions answered in this study. Managers of nine local banks were collected through 80 questionnaires. Through this research, researchers are able to know important employability skills among business graduate from employers. Finally, recommendations were also included in this study.
