ABSTRACT

The purpose of this study was to investigate a study on use of computers in education among students at UiTM Pahang. The scope of the study was from two programs, which Bachelor of Office System Management and Diploma in Office Management and Technology. In this study, the researchers used stratified proportionate random sampling technique. The technique involved 2-step processes of stratification or segregation, followed by random selection of subjects from each stratum. This descriptive study used survey questionnaires which have been distributed to 100 respondents and the return rate was 100%. Data analyze were done by using PSAW 18.0. This study showed that the majority of the respondents agreed that use of computers can affect the students working with computers in education. From the finding, there were some recommendations that should be taken by both parties which are the potential researchers and the responsible management. Firstly, as recommendation in the future, the researchers should do research that not only focus on one program such as Office Management and Technology but must focus on gender differences in the computer usage from different program such as Computer Science, Accountancy, and others. The management that responsible to the students facilities should imporove the Internet facilities all over the place in University in order to facilitate the students to do the assignments and release the students stress. The possible reason and the implications of these findings will be elaborated and discussed.

ACKNOWLEDGEMENT

Alhamdulillah, with the blessing from Allah S.W.T, our group has managed to complete this Research Project (OSM 651), entitled A Study on Use of Computers in Education among Students at UiTM Pahang. This project could not have been written without guidance from our supervisor, Miss Zuria Akmal Binti Saad, who not only served as our supervisor but spends her precious time with our group in giving advice, encouragement and patient in helping us to complete this study. We also want to give special thanks and special grateful to Mr. Abd Razak bin Said, as our Research Coordinator in guide us in Issue in Administrative Management (OSM 651) course.

We would like to express our deepest thanks to family for their understanding and support to complete this OSM 651 project. Finally, we would like to thank to all of our friends, which had contributed ideas and gave helping hand to complete this project and not forget to our respondents too.

Last but not least we would like to thank to others especially those who work together directly or indirectly in the completion of this project.
