

## **ACKNOWLEDGEMENT**

All praises and thanks be to Allah (S.W.T), who has guided us to this, never could we have found guidance, were it not that Allah had guided us!(Q7:43) I would like to thank to Pn NorHayati Hamzah as my supervisor and Mr Idnin Pasya as a project co-supervisor for the direction, assistance, and guidance me doing this research. In particular, Pn Norhayati and Mr Idnin Pasya recommendations and suggestions have been invaluable for the research progress and research improvement.

## **Abstract**

**This project aims to implement the QPSK transmission scheme using Field-Programming-Gate-Array (FPGA) method. This project scope includes studying Verilog codes, using FPGA Xilinx software and implemented on FPGA board. A QPSK transmission scheme consists transmitter and receiver have been successfully designed and implemented.**
