	2.5.1 Zebra Line	11
	2.5.2 Fencing	12
	2.5.3 Buffer	14
	2.5.4 Signage	16
	2.5.5 Covered Pathway	17
	2.5.6 Curb Ramp	19

CHAPTER THREE : LITERATURE REVIEW

3.0	Study Area	20
3.1	Unit of Analysis	20
3.2	Data Collection Procedures	20
3.3	Instrumentation	21
3.4	Data Analysis Technique	21

AKNOWLEDGEMENT

Firstly, Alhamdulillah thanks to Allah S.W.T for giving me strength to complete this research. I would like to express my great appreciation to Mr. Sufian bin Che Amat for his valuable and constructive suggestion during the planning and development of this research. His willingness to give his time so generously has been very much appreciated.

Completing this work would have been difficult without the support and friendship of my family , studiomates , friends and all my lecturer. Thanks for making this possible.

Finally , I wish to thank my parents for their encourage and support throughout my study.

Thank you.

ABSTRACT

The study was carried out in Bandar Baru Seri Iskandar , Perak. Two location studis are selected such as Sekolah Kebangsaan Iskandar Perdana and Tesco Seri Iskandar. The locations are selected within the study area of provision of pedestrian walkway facilities at amenities area. The aim of this research is to understand the role of pedestrian walkway that can helped the pedestrians to get better , comfort and safer pedestrian walkway. The main objective of this research is to identify basic criteria of good pedestrian walkway along the amenities areas , and to determine pedestrian satisfaction level based on the above criteria toward existing pedestrian walkway facilities. The information for this thesis was obtained through primary sources , which is from the books, journals , articles and also secondary resources from the internet. In addition , the observation and questionnaire are also distributed to collect and analyze the data.
