Abstract

This study took approximately 36 weeks and two places are chosen for measurement of voltages, Main Switch Boards in Institute Technology Mara, Shah Alam. The objective of this study is to determine and analyze the quality of Power Supply for the data obtained.

ACKNOWLEDGEMENT

Alhamdulillah. Thank you to Allah for this success.

The completion of this report was due in part to various personnel involved. First of all I would like to express my gratitude to Tuan Haji Muhammad Yahya for his willingness in giving me the opportunity to complete my final project under his supervision. His guidance in introducing the latest power quality technology to face the next millennium is very much appreciated.

I'm taking this opportunity to thank to all the lecturers involved especially En. Mohd Zaki Abdullah for his guidance during the completion of the project their sincere effort in helping me to achieve this success. Also to all my friends who have been together struggling with me throughout the years of my study.

Not to forget to my employer, Telekom Malaysia for giving me the opportunity to further my study.

Lastly, thank you to my family especially my wife Wan Maziah, my kids
and also to my mother for being patient waiting for my success.

CONTENTS

Abstract	i
Acknowledgement	ii
Contents	iii
1.0 Introduction	1
1.1 Power Quality	4
1.2 Voltage Quality	4
1.3 Power Quality Issues	6
1.4 Why are we concerned about Power Quality	7
2.0 Power Quality Problem, Causes And Impacts	8
2.1 Introduction	8
2.2 Surges	9
2.3 Voltage Sag	10

2.4	Voltage swell	11
2.5	Outage	11
2.6	Electrical Noise	12
2.7	Harmonic Distortion	13
2.8	Flicker	13
2.9	Overvoltage	14
2.10	Undervoltage.	14
3.0	Power Quality Monitoring	15
3.1	Introduction	15
3.2	Site Survey	15
3.3	Monitoring system	16
4.0	Measurement	18
4.1	Engineering Block A	18
4.2	Engineering Block B	18
4.3	Report Parameters	20
4.4	Nominal Voltages	21
4.5	Voltage and Current Imbalance	21
5.0	Result	22
5.1	Result for Block A	22
5.2	Result for Block B	25
6.0	Result Analysis	28
6.1	Power Tolerance Envelope	28
