## **Abstract**

This study attempt to compare the impact of educational facilities factors on the student academic achievement (CGPA) of three level of student academic performance, to study on the current condition of educational facilities and proposed action should be taking based on student needs in UiTM Sarawak. Our respondent is full time student in diploma and bachelor level from any faculty and any semester. Data collected through questionnaire and the responses analyzed statistically using the Statistic Package for Social Science (SPSS). The finding of the data shows that the current conditions of the educational facilities were in average. The impact of the educational facilities factor on the student academic achievement (CGPA) based on three level of student academic performance is different across the poor performance with good and excellent performance. However, good and excellent student performance has no significant mean different. Respondents agree that the UiTM Sarawak should allocate more budgets on maintenance and upgrading educational facilities. In this study, there are several suggestions and recommendations to UITM Sarawak.

## Table of Contents

	Page
<b>Chapter 1: Introduction</b>	
1.1 Introduction	1
1.2 Problem statement	2
1.3 Research objectives	4
1.4 Scope of the study	5
1.5 Significance of the study	6
1.6 Definition of terms/concepts	8
<b>Chapter 2: Literature Review &amp; Conceptual Framework</b>	
2.1 Introduction	13
2.2 Characteristic of educational facilities	14
2.3 Impact of the educational facilities	16
2.4 Conceptual framework	23
2.5 Hypothesis	29
<b>Chapter 3: Research Method</b>	
3.1 Research design	30
3.2 Unit of analysis	30
3.3 Sample size	30
3.4 Data collection	31
3.5 Measurement/Instrumentation	32
3.6 Data collection	33
3.7 Data analysis	34

## CHAPTER 1

### 1.1 Introduction

Are educational facilities playing major roles toward students' performance in examination result? This question might appear in the lecturers mind when the statistic shows decreased in the student examination result and this contributed to the increased of student have been dismissed.

Every student has his or her difference preferences on the environment to study and complete their assignments. Therefore, the educational facilities that are provided by the university for the students benefits, in order to gain excellence result be very importance because it functions to facilitate and assist students in completing their tasks and by created an encouraging environment during accomplishing it.

Looking to these effects, we are thinking on the issues raised by the students about their perception towards the facilities provided by the university. In order to create inspirable situations, university management board should take more attention to ensure that the student able to study in conducive condition.

## **CHAPTER 2**

### **LITERATURE REVIEW & CONCEPTUAL FRAMEWORK**

#### **2.1 Literature review**

This chapter provides a review of the literature on educational facilities and the conceptual framework of the study.

##### **2.1.1 Introduction**

Mara University of Technology (UiTM) is one of the leading higher learning institutions in Malaysia that accept the government challenges in creating human capital. In order to ensure that aims successful, higher learning institution should provides good educational facilities that able to equip and assist the undergraduates in classroom and learning process.

Some of the research made in Europe finds that the relationship of the absenteeism among the student is high due to the physical education condition and result in poor performance in academic. Furthermore, classroom physical comfort is critical to learning process effectiveness, satisfactions and student well being. Uncomfortable condition in the classroom such as too deem, too light, too cold, too noisy, too much glare, restrict the ability of student to learn and understand and lead to lowered academic performance and increase in absenteeism.
