## International Exchange Students KMITL-UiTM : Fostering Interdisciplinary Excellence

By: Amirul Hakim Zulkifli, Hasiful Fata Talhah, & Shahrool Rezza Salim

We are delighted to introduce one of our collaborative programs between King Mongkut's Institute of Technology Ladkrabang (KMITL), Thailand And UiTM Cawangan Pulau Pinang (UiTM CPP) that was held on 25th May until 23rd June 2023. It was designed to enhance interdisciplinary learning, research, and innovation. This innovative partnership has brought together the strengths and expertise of both universities in creating a dynamic academic environment that benefits not only students and institutions but communities of both countries as well.

The perks of the program include:

- > Promoting interdisciplinary collaboration between students and faculty,
- > Facilitating joint research projects and academic initiatives.
- > Enhancing international exposure and cultural exchange opportunities.
- > Strengthening academic programs through shared resources and expertise.

### Events Highlights

A total of four passionate students from the School of Food Industry, KMITL had the golden opportunity in joining the Pastry and Confectionery's hands-on course. They attended the course every week to experience the production of desserts along with UiTM CPP's Bachelor of Culinary Arts Management's students. Since they are studying Food Manufacturing Engineering, it complements their knowledge with baking skill to produce the best pastry products. On top of that, it fosters the cross cultural friendship and understanding between both universities' students. This program represents a significant step forward in advancing interdisciplinary education, research, and global perspectives. We hope more foreign universities will join the bandwagon to engage in this exciting initiative, as it opens doors to new opportunities and horizons.
