ABSTRACT

The aim of the study is to examine the usage of the communication technology among students. We are focusing on the academic performance of the respondents. The sample sizes of this study are students from Kolej Sentral and UiTM Jengka, Pahang. 60 questionnaires were distributed but only 50 were useful for further analysis. The results showed a positive relationship between the communication technology and academic performance. The result was consisted with previous studies that also indicated a positive result between communication technology and academic performance.

ACKNOWLEDGEMENT

Bismillahirrahmanirrahim...

First and foremost, we, Muhammad Nur Syahib bin Zahari and Mohamad Hafiz bin Harun, thanks to Allah for giving us the strength, courage, guidance and faith that this project would be successful. Without His Mercy we might not be able to accomplish our project in order to fulfill the requirements needed for the Research Methods and Issues in Administrative Management course.

We also would like to express our deepest gratitude and appreciation to the following individuals who contributed valuable assistance and knowledge to complete this project.

Especially we would like to express our grateful thanks to our lecturer, Tuan Haji Abd. Razak bin Said, and our supervisor, Dr. Wan Kalthom Hj. Yahya for all the time, guide and supervision to completing this project.

Next, we would like to say thanks to our friends for all the support that there had given to us in completing this project. We also would like to thank our classmates for giving us some idea to make sure our project finished according to the plan.

Lastly, this project is also a dedication to our beloved parents for their support, prayers and loves.

Thank you very much.
