ACKNOWLEDGEMENT

In the name of Allah, the most gracious and the most merciful with Selawat and Salam to the Prophet Muhammad S.A.W. Alhamdulillah, thanks to Allah S.W.T for blessing me with His mercifulness for my health, Strength and life all this time. With the help and permission of Allah, a lot of efforts and self-confidence

This thesis would not be accomplished without the enormous help of several institutes, teachers, colleagues and friends. I would like to take this opportunity to thank everyone who has been important and helpful to me during this thesis work. All my colleagues from Department of Art & Design at University Teknologi Mara Alor Gajah, Melaka have been very friendly and supportive. Thank you all.

I would like to express my appreciation to my supervisor, Prof. Madya Dr. Azahar bin Harun and Madam Ilinadia binti Jamil for guidance, advice, valuable suggestion, encouragement and moral support throughout the completion of this project. A million thanks to them for being so nice, patient and kind in dealing with my queries and problems during this semester and for gave me lots of information during providing the implementation of this research.

Last but not least, to those who have directly or indirectly contributed in this research that I am not mentioned. Thank you so much.

Abstract

The impact of multimedia learning on skateboarding skill mastery among novice skateboarders in Kuala Lumpur is investigated in this thesis. Quantitative surveys were carried out using a mixed-methods methodology. Participants' exposure to multimedia learning resources and perceptions of their effects on skill development were evaluated via surveys. The interviews gave participants' experiences and views of multimedia learning additional context. The results support sports education by guiding the development of successful learning interventions for newbie skateboarders. The knowledge gained can help educators, trainers, and instructional designers improve skill development and maximise learning opportunities for novice skateboarders in Kuala Lumpur.
