## **ABSTRACT**

Dyslexic children's education in the Jawi script, an integral part of the Muslim community's cultural and religious heritage, has been overlooked in current educational practices. Dyslexic children face specific challenges learning Jawi due to its linguistic complexity. However, Jawi education focuses on typically developing children, neglecting dyslexic learners. This abstract highlights the importance of addressing this educational gap. It emphasizes the necessity for targeted interventions and inclusive instructional approaches to support dyslexic children in their Jawi education, promoting their engagement, cultural connection, and overall literacy development. The neglect of dyslexic children's education in the Jawi script undermines their access to and engagement with their cultural heritage. In addition, it impedes their development of essential literacy skills. Dyslexic learners encounter particular challenges related to phonological processing, decoding, and symbol recognition. This makes it imperative to address their specific needs in Jawi education. By implementing inclusive instructional approaches, incorporating dyslexia-friendly design elements, and enhancing teacher awareness and support, we can ensure that dyslexic children receive the necessary educational support to thrive on their Jawi learning journey. This would empower them to connect with their cultural roots while overcoming their specific challenges in Jawi education, fostering their academic and personal growth.

## ACKNOWLEDGEMENT

I would like to express my deepest gratitude and appreciation to all those who have contributed to the successful completion of my thesis on "The Use of Interactive Books as a New Tool for Dyslexic Children in Jawi Learning." This journey would not have been possible without the support, guidance, and encouragement of numerous individuals and institutions.

First and foremost, I would like to thank my thesis supervisor, Puan Nor Fariza Baharuddin. I am grateful for their invaluable guidance, expertise, and unwavering support throughout the research process. Their profound knowledge and commitment to my academic growth have shaped the direction of this study.

I am also indebted to the dyslexic teaching staff especially teachers who willingly participated in this research. Their enthusiasm, resilience, and eagerness to learn inspired me throughout this study. Their willingness to share their experiences and perspectives has enriched the findings and added depth to the understanding of the use of interactive books in Jawi learning.

I am deeply grateful to the teachers and educators who facilitated the research process. They provided valuable insights into Jawi education for dyslexic children. Their dedication to their profession and commitment to inclusive education is truly commendable.

Lastly, I would like to express my gratitude to my family and friends for their unwavering support, patience, and understanding during this demanding academic journey. Their encouragement and belief in my abilities are a constant source of motivation.

In conclusion, I am humbled and grateful for the collective efforts and support I have received throughout this thesis. Each individual and institution mentioned above has played a significant role in shaping the research, and their contributions will forever be cherished.
