UiTM-FSQD Negeri Sembilan collaborate to launch the First Food Safety for Young Generation (FOOYOO) Programme in Negeri Sembilan

NURSABRINA MUNAWAR & EDDIE TI TJIH TAN

The Food Technology Department, Faculty of Applied Sciences, Universiti Teknologi MARA Cawangan Negeri Sembilan (UiTMCNS), in collaboration with the Food Safety and Quality Division (FSQD) of the Negeri Sembilan State's Health Department, jointly organised the inaugural "Food Safety for Young Generation" (FOOYOO) Programme in Negeri Sembilan on 6th December 2022. This one-day programme was fully sponsored by FSQD and took place at the UiTMCNS Kuala Pilah Campus. The programme successfully attracted 50 undergraduate students. The collaboration was initiated in 2020 but experienced delayed due to Covid-19 Movement Control Order. FOOYOO is aimed at the younger generation, with the goal of developing student's potential by making food safety a Unique Selling Point (USP) in their professional development and careers, aligning with the principles of Industrial Revolution 4.0.

Aerobikton

The closing ceremony was officiated by Ts. Dr. Wan Syazehan Ruznan, the Head of the Study Centre for Industrial Technology in UiTMCNS

Ts. Dr. Wan Syazehan Ruznan, the Head of the Study Centre for Industrial Technology at UiTMCNS, stated, "this program demonstrates our collective commitment to focus on preventing, detecting, and managing the risks associated with foodborne illnesses. Students

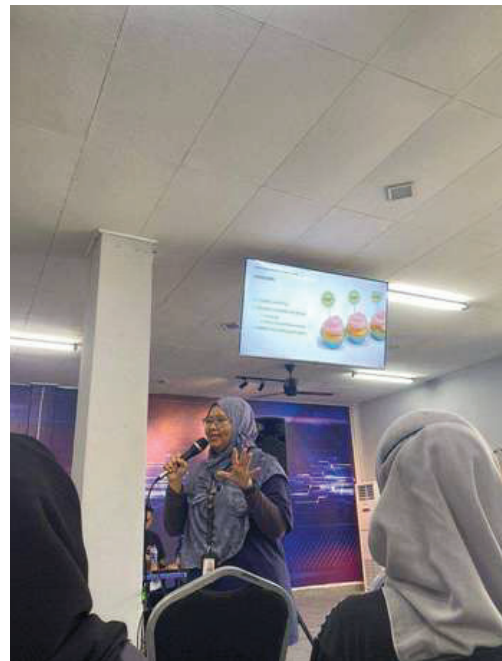

Organiser and participants

will begin to comprehend and become more attuned to food safety issues, integrating it into their everyday lives,” during the closing ceremony. Various approaches were introduced to the students, including briefings on FSQD activities, an Aerobikton session, an Explorace FOOYOO event, and Food Premises Inspection Simulation at the Cafeteria of UiTM Kuala Pilah Campus conducted by Health Inspectors. All these activities aimed to provide up-to-date knowledge and exposure to all participants, and are expected to be beneficial. Active students’ participation in the event enabled them to enhance the essential skill sets, such as effective oral communication, accessing and analysing information, critical thinking, and problem-solving.

The one-day programme was also graced by the presence of Madam Siti Aminah Ramli, the Principal Assistant Director of FSQD in Negeri Sembilan, along with officers from FSQD, Health Inspectors, and Food Technology Lecturers from UiTMCNS.
