## ACKNOWLEDGEMENT

It is great pleasure for me to undertake this paper project. I feel highly doing the project entitled – **“FACTORS AFFECTING EXCHANGE RATE IN MALAYSIA”**

Firstly, I would like to express my special thanks of gratitude to my both advisor which is **MADAM ZURAIDA BINTI MOHAMAD** and **MADAM ROHAYATI BINTI JUSOH** for their kind support and guidance to successfully complete my paper project. This project paper would not have completed without their enormous help and worthy experience. Whenever I was in need, they were there behind me. I really thankful to them.

Secondly, I would like also to thank my parents who always give a support for me to finishing this project paper within the limited time. And also, my friends and classmates, who always sharing their ideas and opinions with me.

I am making this paper project not only for marks but to also increase my knowledge and I hope that this paper project will give a benefit in the future.

## ABSTRACT

This research paper examines the factors affecting exchange rate in Malaysia by using gross domestic product, import, export, inflation and foreign direct investment as selected variables. As for 38 number of observation which is from 1980 to 2017, this research applied time series analysis method and Ordinary Least Square (OLS) analyze the data and determine of the affecting of selective variables towards exchange rate. The result from this research indicates that GDP (MYR), import, inflation are positively significant with the exchange rate. Meanwhile, for GDP (USD) and export are negatively significant with the exchange rate. For FDI, the result shows that there is negatively insignificant between FDI and the exchange rate.
