

## UNIVERSITI TEKNOLOGI MARA

### CSC701: AUTOMATA THEORY AND FORMAL LANGUAGE

<b>Course Name (English)</b>	AUTOMATA THEORY AND FORMAL LANGUAGE <b>APPROVED</b>
<b>Course Code</b>	CSC701
<b>MQF Credit</b>	3
<b>Course Description</b>	The goal of this course is to study abstract computing devices or “machines”. Finite automata is a simpler kinds of machines used to model hardware and software and used extensively in compiler design and construction. The studies of formal “grammars” is incorporated because of the close relationships to abstract automata especially as a basis of software components including parts of compilers. Towards the end, students will be introduced to the Turing Machine, a simple model of a computer and discuss about the kind of languages abstract computers can accept
<b>Transferable Skills</b>	Demonstrate ability to apply creative, imaginative and innovative thinking and ideas to problem solving
<b>Teaching Methodologies</b>	Lectures, Presentation
<b>CLO</b>	CLO1 Explain how the relevant theories pertaining to respective models of computation CLO2 Construct a relevant automata based on a given grammar and vice versa CLO3 Build a program for the automata based on the formal languages given
<b>Pre-Requisite Courses</b>	No course recommendations
<b>Topics</b>	
<b>1. MATHEMATICAL PRELIMINARIES AND FINITE AUTOMATA</b> 1.1) Mathematical Preliminaries -Sets,Alphabets,Languages,Graph 1.2) Deterministic and Non Deterministic Finite Automata	
<b>2. REGULAR LANGUAGES AND REGULAR GRAMMARS</b> 2.1) Finite Automata and Regular Expressions 2.2) Regular Grammar	
<b>3. PROPERTIES OF REGULAR LANGUAGES</b> 3.1) Closure Properties of Regular Languages	
<b>4. CONTEXT-FREE GRAMMARS AND LANGUAGES</b> 4.1) Context Free Grammar, Derivation Trees	
<b>5. SIMPLIFICATION OF CONTEXT FREE GRAMMARS</b> 5.1) Chomsky and Greibach Normal Form 5.2) Applications of CFG	
<b>6. PUSHDOWN AUTOMATA</b> 6.1) Informal description and definitions 6.2) The language of PDA	
<b>7. CONTEXT FREE LANGUAGES</b> 7.1) Equivalence of PDA and CFL	
<b>8. PROPERTIES OF CONTEXT-FREE LANGUAGES (CFL)</b> 8.1) Pumping Lemma , closure properties and decision algorithm of CFL	
<b>9. TURING MACHINES AND COMPUTERS</b> 9.1) Standard Turing Machine and techniques for Turing Machine construction 9.2) Turing machines as enumerators and variations of Turing machines	

**10. CHOMSKY HIERARCHY**

10.1) Church Turing Thesis

10.2) Relations Between Classes of Languages

Assessment Breakdown	%
Continuous Assessment	100.00%

Details of Continuous Assessment	Assessment Type	Assessment Description	% of Total Mark	CLO
	Assignment	Assignment	30%	CLO1
	Group Project	Group project	30%	CLO3
	Quiz	Quiz 1	5%	CLO1
	Quiz	Quiz 2	5%	CLO2
	Test	Test 1	15%	CLO1
	Test	Test 2	15%	CLO2
