

## UNIVERSITI TEKNOLOGI MARA

### CSC789: SPECIAL TOPIC (SOFTWARE ENGINEERING)

<b>Course Name (English)</b>	SPECIAL TOPIC (SOFTWARE ENGINEERING) <b>APPROVED</b>
<b>Course Code</b>	CSC789
<b>MQF Credit</b>	3
<b>Course Description</b>	The objective of this course is to help a student to get started in the Research Project in the following semester. The course provides for individual study in areas of computer science not covered in the regular curriculum under the supervision of a computer science lecturer. The supervisor guides the student in the research process. The student and the supervisor should have an agreement on the work to be done by the student in advance; and then, develop the work over the semester. Regular meetings with the supervisor are required. The student may be asked to research and review literature in the area of the planned Research Project, or to analyse/ compare/ improve/ apply selected algorithms or methods as part of the process of developing solutions to the Research Project's problem. The work done is to be presented in a form of a paper that is phrased and structured like an academic article, and also communicated in an informal oral presentation.
<b>Transferable Skills</b>	After completing of this course, the students should be able to: <ul style="list-style-type: none"><li>• demonstrate knowledge and understanding on a particular topic of research</li><li>• initiate in critical thinking and analysis</li><li>• revise prior research and methods</li><li>• compose research activities and findings in oral and written form</li></ul>
<b>Teaching Methodologies</b>	Supervision
<b>CLO</b>	CLO1 Demonstrate knowledge and understanding on a particular topic of research CLO2 Initiate in critical thinking and analysis CLO3 Revise prior research and methods CLO4 Compose research activities and findings in oral and written form
<b>Pre-Requisite Courses</b>	No course recommendations
<b>Topics</b>	
<b>1. Problem Specification</b> 1.1) Does it describe what the author hoped to achieve accurately and clearly state the problem being investigated? 1.2) Does it describe the theoretical soundness of research background of the study? 1.3) Does the author summarize relevant research to provide context and explain what previous findings are being 1.4) challenged or extended?	
<b>2. Literature Review and Analysis, Development</b> 2.1) Does the reviews gathered from a variety of quality resources? 2.2) Does the author include fundamental theory to support hypothesis/chosen methodology/analysis technique? 2.3) Does the author include critical review relating to the problem studied?	
<b>3. Conclusion</b> 3.1) Are the claims in this section supported by the results, do they seem reasonable? 3.2) Have the author indicated how the results relate to expectations and to earlier research? 3.3) Does the article support or contradict previous theories? 3.4) Does the conclusion explain how the research has moved the body of scientific knowledge forward?	

**4. Presentation**

- 4.1) Does the article properly written (correct use of grammar and spelling error) and well organized?
- 4.2) Does the article adhere to the IEEE format/guidelines?
- 4.3) Does all sources of references and citations, labelling of figures and tables etc are properly written and documented?

Assessment Breakdown	%
Continuous Assessment	40.00%
Final Assessment	60.00%

Details of Continuous Assessment	Assessment Type	Assessment Description	% of Total Mark	CLO
	Written Report	n/a	40%	CLO1 , CLO2 , CLO3 , CLO4
