This thesis project assigned to me gave a tremendous impact toward me my-self. The impact was very beneficial for me in terms of enhancing my knowledge into deeper accounts. First and foremost, I want to express my deepest appreciation to my research advisor, Puan Zuhairah Hasan for the guidance and advice. The willingness to motivate me had contributed tremendously to my project completion. I also want to say my deepest thanks to my parents and also my friends who also helped me on this project. Without their encouragement, suggestions, ideas and comment throughout the days and months, this research could not be completed on time. Besides, also thanks to all the respondents of employees from Jakel Trading Company Segamat that had gave a full commitment and support to answer the distributed questionnaire. They played a big role in order to help me to complete this research. Information needed will not able to be obtained without their help. Thus that may affect the process of preparing this thesis. Last but not least, a tons of gratitude to the lecturers, professors, classmates and to every one of those who helped me either direct or indirectly to finish this research and also a million thanks to UiTM Melaka, Kampus Bandaraya Melaka for the opportunity to conduct this research in very conducive facility provided as well as the environment.

ABSTRACT

The purpose of this study was to examine factors of human resource management practices affecting organizational performance. This study employed descriptive research method in gathering, analyzing, interpreting, and presenting the information. The descriptive research design helped in focusing at the strength of relationship among factors of human resource management practices affecting organizational performance. The use of questionnaires were applied to obtain responses from employees of Jakel Trading Company. 139 usable questionnaires were usable and analyzed. The study adopted both descriptive and inferential statistics in data analysis and presentation. Correlations and frequencies are among the statistical measures used in this study. The study found that all the three hypotheses are supported. The results of multiple regression showed that staffs training, performance appraisal and rewards and recognition ere all significant factors of human resource management practices affecting organizational performance. It is clear from the findings that staffs training and recognition do affect the organizational performance as a whole. This study provides input the employers in how to reward and motivate their staffs for better performance.
