## **ACKNOWLEDGEMENT**

Praised is to Allah S.W.T, the most Beneficent and the most Merciful, for His blessing in enabling me to undertake this project paper.

First of all, I would like to take this opportunity to special thanks my appreciation and gratitude to my helpful advisor, Puan Salwani Binti Affandi for her valuable guidance and advises as well as suggestion given throughout the preparation and undertaking of this study. Not forget to Puan Suhaily Maizan Binti Abdul Manaf as my second examiner for her support to complete this study.

I am greatly indebted to each and every respondent who assists me in providing with valuable information and help me to complete this research. Also, to whom that has guidance me in every single day duty and provided outstanding support.

Lastly, a special acknowledgement goes to UiTM, for giving me the opportunity for me to pursue the study in BBA (Hons) in Finance. Also, I would like to thankful any individual or people in the making this project paper, directly or indirectly.

Thank you.

## ABSTRACT

This paper uses dynamic panel data methods to examine the effect of macroeconomic indicators on the non-performing loans (NPLs) in the Asian Pacific Region. Applying yearly data for twelve (12) years from 2000 to 2011 for eighteen countries, the dependent variable in this study is non-performing loans (NPLs) while the interest rate (INT), inflation rate (INF), economic growth (GDP) and exchange rate (EXC) are the independent variable in this study. Other than that, this study was being tested using Pooled Ordinary Least Square (POLS), Random Effect (Breusch and Pagan Lagrangian Multiplier Test), Random Effect Generalized Lease Square Regression (GLS) and Fixed Effect (Hausman Fixed Test). The results suggest that interest rate, inflation rate are significant and having positive and negative relationship with NPLs. The others variable are not significant with NPLs.

**Key words:** Non-performing loans; Macroeconomic indicators; Gross domestic product; Debtors; Exchange rate
