## ABSTRACT.

LRT system need a dedicated feeder bus system for the commuters to access and egress from an LRT2 station on time. As to give efficient and effective service to the public scheduling between LRT and feeder bus is important. The scheduling between LRT and feeder bus may enhance the number of the public transport ridership, the viability of LRT and feeder bus, and provide optimal accessibility to LRT stations.

The integration between LRT and feeder bus makes the passengers easier to move from origin to other places and reduce the waiting time where the services are on time. It will encourage people to use the public transport and it is hoped that public transport will be a preferable way for commuters to move in city centre.

Public transport such as buses and trains or LRT are necessary in order to have better traffic flow. Furthermore, public transports is able to help in reducing the number of vehicles on the road and directly decreased congestion, accidents, delays and many other factors that may lead to congestion.

## ACKNOWLEDGEMENTS.

**In the name of Allah, most gracious and most merciful.**

During the making of this Graduation Exercise, many people have been involved in many different ways. It would be impossible to give appropriate recognition to all who have contributed significantly to the development of the thesis.

In this regard, I would like to forward my appreciation to Dr. Rosli Nekmat , the Deputy Director of Pengurusan LRT Sdn. Bhd for giving me the permission to do my Industrial Attachment at his department.

I indebted to my advisor Pn. Sabariah Jemali, who help me in completing the thesis. Without her assistance, innovative, comments and creativity; the task of completing the research would have been almost insurmountably more difficult.

I wish to express my gratitude to En. Mohd Yazid Ismail from Commercial Vehicle Licensing Board (CVLB) , En. Zaidee from Transplan, En. Hasan Abd. Ghani from Construction Management Division and all PLRT staff for their valuable contribution.

Lastly, special thanks to my parents, brothers, sisters and all the people that I care who have been both encouraging and inspiring me in doing the dissertation , not forgetting my colleagues who have been of help to me in so many different ways.
