ACKNOWLEDGMENT

Bismillahirrahmanirrahim.....

I am very grateful to Allah SWT for giving me the strength and opportunity to complete this project paper. Without His Grace and Mercifulness this project may not be completed on time.

Syukur Al-Hamdullilah

This project paper will not be completed without the help from other people. Therefore I would like to express my heartfelt appreciation to each of them who had directly or indirectly been involved in my preparation of this project paper.

First of all, I am deeply indebted to my supervisor, Dr. Wan Mansor Wan Mahmood who has so patiently guided me during the preparation of this dissertation until its completion. Thank you.

Not forgetting all my friends especially those who had helped me in gathering the information and also patiently be with me during the whole process of completing this project paper. Thank you for all your understanding, helps and useful ideas.

I am also grateful to all the staff at KLSE library, UiTM Shah Alam Library and also UiTM campus Dungun Library. Without their guidance and help, all references and information may not be possibly gathered.

ABSTRACT

The purpose of this study is to investigate the relationship between price, trading volume and market depth of crude palm oil futures (CPO) and stock index futures in Malaysian Futures Market using a unique data set that is covered from December 15, 1995 to January 19, 2001. Specifically, the data set includes the daily average price, trading volume and open interest of CPO futures and stock index futures for KLCI. This study is not only limited to the determination of the relationship between price volatility and volume but also considers the likely effect of open interest, a proxy for market depth, has on volatility. By using unit root test, it is found that after first differencing, the null hypothesis is rejected, conforming that the return series are integrated in order 1, $I(1)$. In addition, because the pairs of all variables are cointegrated, there is causality in Granger sense between returns, volume and open interest. The results report bi-directional relationship for most of the cases. In contrast, the results of Error Correction Model (ECM) indicate that the sample regression lines do not fit the data and only nine pairs out of fourteen pairs of variables are found to be statistically significant. Moreover, using generalized autoregressive conditional heteroscedasticity (GARCH) model, this paper found out that there do exist the relatively significant relationship between most of those variables.

ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF TABLES	ix
LIST OF FIGURES	xi
LIST OF ABBREVIATION	xii
CHAPTER ONE : INTRODUCTION	
1.1 INTRODUCTION	1
1.2 PROBLEM STATEMENT	4
1.3 THE AIM OF THE STUDY	4
1.4 OVERVIEW OF THE PROJECT PAPER	5
CHAPTER TWO : LITERATURE REVIEW	
2.1 LITERATURE REVIEW	7
2.1.1 REVIEWS ON METHODOLOGY	7
2.1.2 REVIEWS ON RESULTS OF PAST RESEARCH	12
CHAPTER THREE : MALAYSIAN FUTURES MARKET	
3.1 INTRODUCTION	22
3.2 FUNCTIONS OF FUTURES MARKETS	23
3.2.1 PRICE DISCOVERY	23
3.2.2 HEDGING MECHANISM	23

3.3 FUTURES MARKET PARTICIPANTS	24
3.3.1 HEDGERS	24
3.3.2 SPECULATORS	24
3.3.3 ARBITRAGEURS	24
3.4 THE STRUCTURE OF FUTURES MARKETS	25
3.4.1 THE CLEARING HOUSE	25
3.4.2 DELIVERY	25
3.4.3 MARGIN REQUIREMENT	25
3.4.4 SETTLEMENT-TO-MARKET	26
3.5 REGULATION OF FUTURES MARKETS	26
3.5.1 AIM OF REGULATION	26
3.5.2 REGULATORY FRAMEWORK	26
3.6 OVERVIEW OF MALAYSIAN FUTURES MARKET	28
3.6.1 THE KLSE CI FUTURES CONTRACT	28
3.6.2 CRUDE PALM OIL FUTURES MARKET	31
3.8 MARKET ANALYSIS	36
3.8.1 UNDERSTANDING PRICE, VOLUME AND OPEN INTEREST	38
CHAPTER FOUR : SAMPLE DATA AND METHODOLOGY	
4.1 SAMPLE DATA	41
4.1.1 DATA COLLECTION PROCEDURES	42
4.2 RESEARCH METHODOLOGY	42
4.2.1 RESEARCH DESIGN	43
4.2.1.1 TEST FOR STATIONARITY	43
4.2.1.2 TEST FOR COINTEGRATION	43
4.2.1.3 GRANGER CAUSALITY AND ERROR CORRECTION MODEL	44
4.1.2.4 GARCH MODEL	47
