ABSTRACT

The purpose of this study was to measure the relationship between ergonomic and employee's performance at Petroliam Nasional Berhad (PETRONAS) in Kuala Lumpur. This study also uses to identify the current problem faced by the employees. Other that, this study needs to identify how the ergonomic was implement by the employees within the office. The questionnaires has been distributed randomly to the respondent who working in Department of Project Risk Management. About 86 respondents have answer the questionnaires distribute. In order to make some improvement to the employees at Petroliam Nasional Berhad (PETRONAS) in Kuala Lumpur, some suggestion and recommendation was stated.

ACKNOWLEDGEMENT

Assalamualaikum WBT... praise to Allah the almighty for giving us health and strength to complete this research project. Firstly, thanks to all members in this group for the cooperation, money and time what we have sacrificed for this research project. As we know, teamwork and commitment leads us to come out with the best rather than do it alone.

Secondly, I would like to express my special thankful to Madam Noor Dalila for her supports, encouragements and guidance during the process of completing and preparing this research projects

In addition, a bunch of thanks to respondents from the Department of Project Risk Management especially to my supervisor Mr. Rohith for their willingness in helping me collecting data for this study and answering the questionnaires for this study.

Last but not least, I also like to extent this gratitude to my parents and individual who was involved directly and indirectly for their supportive and encouragements to make sure I have motivated to accomplish this study.
