ABSTRACT

This research study is about Relationship between Ambidextrous Leadership Style and Employee's Innovation. The study aims to indicate the two independent variable which is opening and closing behavior of leadership style.

This research study was made at Pejabat Daerah Dungun. The respondents are from support and management staff. The data collections by this study analyzed by distribute questionnaires. All the data that have been collected is analyzed by using SPSS version 20.0 for Windows. The result of finding, explain further on which behaviors that contribute and significant to the dependent variable, employee innovation that are being tested.

ACKNOWLEDGEMENT

السلام عليكم ورحمة الله وبركاته

Alhamdulillah, I have finally able to finish this Final Year Academic Project (ASM662) although the time constraints and other circumstances. I would like to thank to Sir Mohd Amlil Bin Abdullah @ Baharum, my Lecturer for this subject and Madam Zuria Akmal binti Saad, my Industrial Training Supervisor for their willingness, kindness and guidance in helping me while doing this portfolio.

I also would like to thank to Mr. Nor Azme bin Salim, my Supervisor at Pejabat Daerah Dungun. He has plays such an important role in completing this portfolio. He personally has given me useful tips and advice during the process of doing this portfolio. Without his guidance and advice, all that I can say is, I will be completely hopeless.

Not forgotten, all of my friends for helping me in completing this portfolio. I also would like to thank my beloved families for their patience and their moral and financial support when I was facing with the obstacles during completing this Final Year Academic Project.

Last but not least, I hope I will successfully achieve a good grade in this subject. There is no more words that can describe how relieve I feel when I were able to finish this thesis. Once again, thanks to all for helping me through these hard times.
