This thesis is submitted to the Faculty of Business Management, Universiti Teknologi Mara in partial fulfilment of the requirement for the degree of Bachelor of Business Administration with Honours (Business Economics).

**SEPTEMBER 2012**

## ABSTRACT

The cement industry is one of the important industry since the increasing of population and human activities cause the trade of this industry is profitable and positively increase. There are many type of forecasting techniques that has been a great deal of discussion on applications of performance in business activities. This paper discussed few of univariate time series forecasting models and their application for forecasting cement price in Sabah. Applying annual data from 1980 until 2011 on cement price per metric tonnes, the best forecasting technique is Holt-Winter with multiplicative exponential smoothing based on the lowest Root Mean Square Error (RMSE).

## ACKNOWLEDGEMENT

I would like to thank and praise to ALLAH S.W.T almighty in giving me strength and great experience to completing this thesis on time and keeps me on believing that this project paper would be possible and more interesting. I would also like to express my very great appreciation to Sir Hylmee Matahir, Sir Hj.Wahi Bin Ismail, Dr. Imbarine Bujang, Mrs Sumaffiatiee Sulong , and Sir Sheikh Junaidi Sheikh Mohammad for their valuable and constructive suggestions during the planning and development of this project paper. Their willingness to give their time so generously has been very much appreciated. I am also indebted to my families, all lecturers, classmates, roommates, all my friends and all peoples directly and indirectly who involved to completing this research. Finally, an honorable mention goes to my scholarship from Ministry of Youth and Sport for supports me financially on this project paper. I especially also wanted to thank my families who inspired ,encouraged and fully supported me in every trial that came to my way. Also, I thank them for giving me not just financial ,but moral and spiritual support. Without helps of the particular that mentioned above, I would face many difficulties while doing this project paper. Thank you very much and may Allah S.W.T. bless us.
