TABLE OF CONTENTS .

SINOPSIS/ABSTRACT

Management Information System (MIS) is one of the subject that have to be taken by students of Advance Diploma in Business Studies. In this subject, The students have to undertake a project as a partial requirement to complete the course. As such, the topic chosen by this group is The Automation of IFM Registration System.

IFM is one of the Institution for Malaysian Bumiputera which offers 2 courses. The courses are LCCI (The London Chamber of Commerce And Industry) and ICA (The Institute of Cooperative Auditors).

Recently, IFM planned to use an automation system for processing the students' registration application form which is currently done manually. Therefore in order to achieve the objectives of automation for the system, a research had been done which covers cost and benefit involved in the system.

The accuracy and detail information are required to achieve the efficient and effective system. The information are gathered from the internal and external sources through the personal interview, observation and analysis from the documents.

The registration process includes several processes:-

   i) Accept applicant data

  ii) Verify the applicant result

iii) Selecting the shortlisted

  iv) Interview session

   v) Processing of interview result

However only some of the processs can be automized. The development of the programs are done following the criteria required by IFM. On the other hand, the development of the programs are not totally well done. This is due to the lack of experience in developing the programs and the time constraint.

The team members involved in this project are listed below :

TEAM LEADER

(YUSHALIZA BT ALIAS)

MEMBERS

(JUNAIDAH BT JUFRI)   (ZAITON BT ABD. AZIZ)

MARDIANA BT ABD. RAHMAN   MUDZAFFAR ALFIAN B
    90013460   MUSTAFA

ACKNOWLEDGEMENT

In preparing this project, several persons were responsible in helping us to complete it and we would like to take this oppurcunity to express our gratitude to them.

First and foremost, we would like to give our gratitude to En. Kamaruddin Sulaiman, our lecturer, for his guidance, tolerance and patience shown to us while we were completing this project.

Secondly, we'd like to say thanks to several people who had kindly contributed their precious time and willingness to participate in completing the project, especially :

1. En. Shukor
   Assistant Director,
   Department of Education,
   MARA.

2. En. Azmi
   Principal,
   MARA Institute of Commerce.

3. Staff of MARA Institute of Commerce.

4. Our coursemates in ADBS (MKTG)

5. Our roomates.

We would also like to seek forgiveness for any unreasonable actions caused by us to anybody in the course of our work.

Lastly, the work and cooperation shown by this group was great and it was nice working together.
