ABSTRACT

Nowadays, ICT usage is increased among employees in the organization parallel with the trend of technology in the organization. However, does all employees are satisfied with the implementation of ICT at their workplace? Thus, through this research we identified the types of ICT usage in the organization. Also, we identified which factors that gives the most influence of ICT usage toward employees' job satisfaction and also found the relationship between ICT and employees' job satisfaction. The factors that may influence employees' job satisfaction that we used in the research are task, information and skills. The data were collected by questionnaires that distributed at nearby organizations. The employees were given a week to answer the questionnaire before returned it. The finding of the study showed that most employees in an organization are familiar with type of ICT which is letters or documents. Other than that, the most influenced factor of ICT to the employees' job satisfaction is skill. Also, there is a relationship between ICT and employees' job satisfaction and it is a weak relationship. As the conclusion, based on the result, the employees are not satisfied with the ICT at their workplace. It is recommended that employees should be train in order to have skill in using ICT and top management should supervise the employees when using the ICT type or facilities. Other than that, top management should provide updated and easy-to-use ICT equipment.

Keywords - Information Communication and Technology (ICT), Employees' job satisfaction, Information Communication and Technology usage

ACKNOWLEDGEMENT

Bismillahirrahmanirahim.

Thanks to Allah for His graciousness, I am able to complete this study well with contribution and cooperation from various parties in order to collect the data for questionnaire. I would like to thank the staffs at the place that I do my internship which is at Quorum Management Sdn. Bhd. who treat and cooperate with me during my internship period. I also like to thank for those who gave their cooperation during collecting data for questionnaire which is employees in Jabatan Pendidikan Negeri Pahang, Indera Mahkota, Kuantan. Also, thanks to my advisor at campus UiTM Jengka, Madam Zarirah binti Zamakhsari who gave me advise and guide in order to do the research in correct way from beginning until the end of my study. Big thanks to my supervisor at internship office, Puan Rostila binti Ibrahim who guided me in order to do tasks in the office. Thanks to my group mate, Siti Hasnidaa binti Senain and Nor Atiah binti Kamarudin who share opinions and ideas in order to complete the research entitled “The Relationship between Information and Communication Technology (ICT) and Employees’ Job Satisfaction in Jabatan Pendidikan Negeri Pahang, Indera Mahkota, Kuantan”.
