ACKNOWLEDGEMENTS

I would like to acknowledge the contribution of Upperstar restaurant respondents who participated within the survey that thus freely and overtly provided the mandatory inputs, though it's just about not possible to acknowledge and to recognize individually each person who created a significant contribution. To the lecturers especially my advisor, Madam Sharifah Nurafizah Syed Annuar who kindly assisted me to this thesis and how to do well in research survey, thank you very much.

A special feeling to my wonderful family, I'm so grateful for their emotional support, encouragement and love. To my friends and colleagues at the Bachelor of Business Management Administration (Hons) Marketing and Bachelor of Business Management Administration (Hons) Business Economics UiTM, thank you very much. These people have contributed in ways that too various to say.

ABSTRACT

The eatertainment restaurant is one amongst the foremost notable developments within the Malaysian food service industry. The sector has grown at a speedy rate from time to time. It's believed that this business is benefiting as a result of current native demographic trends, the urbanization and additionally the lifestyle of individuals nowadays that keep ever changing. Besides that, one amongst the most important customers of this eatertainment restaurant is the college students which are considered as the majority population for this scenario contribution. This might be noteworthy to check or to look at how they see the eatertainment industry in Malaysia. This research also initially to explore patrons' perceptions regarding the eatertainment restaurants quality of services that this industry provided for their customers. Furthermore, this research also to examines the feature that could leverage consumer predilection for this eatertainment restaurant and analyses different eatertainment restaurant positions in the public market. This quantitative study was conducted at various eatertainment restaurant outlets in Kota Kinabalu city. A survey was conducted through distributing questionnaires to patrons from different eatertainment restaurant branches. A total 120 self administered questionnaires were distributed with a 100% response rate. Using quantitative analysis, the data was computed and analyzed by using SPSS program. The results indicate that patrons perceive eatertainment restaurant in Malaysia to be of a high quality. Their eatertainment restaurant choices were strongly influenced by the restaurants cleanliness, consistency of menu items and location. Marketers need to identify the factors that local customers consider more important when making a decision on the selection of a eatertainment restaurant and their marketing strategies should
