## **ABSTRACT**

### **MULTIPURPOSE DRESSING TABLE WITH STORAGE AND WHEELS**

The nation is currently confronted with a number of serious difficulties as a result of population increase and resource constraint. Due to overcrowding in urban areas, individuals are forced to live in compact spaces such as flats or apartments. Overcrowding in living quarters may lead to economic and social concerns, and restricted material alternatives not only reduce quality of life. Multipurpose furniture has evolved as one of the solutions for space sustainability as a result of all of these difficult difficulties. Multipurpose furniture integrates many purposes into a single object, reducing material consumption and conserving space for the user. To overcome this situation, a design for a multipurpose dressing table with storage and wheels will be developed for this project. The chosen responder was given a set of the questionnaire to provide comments based on the design provided. The study's findings reveal that respondents agree with the factors of material, design, marketing, and product satisfaction. This study's goal has been accomplished. Many responders approved of the product design.

## **ACKNOWLEDGEMENTS**

Alhamdulillah, first and foremost, I would deliver my gratitude to Allah for whom with His willing gives me the most valuable chance as well as for providing me with the peace of mind and physical strength to complete my research. A special thanks to my supervisor, Puan Norhafizah binti Rosman. She is not just a committed supervisor, but also a lecturer who has provided ongoing guidance and motivation throughout the project's completion. This work would be impossible to complete without her assistance. Additionally, I had like to express my thanks and gratitude to my advisor, Dr. Siti Zalifah Binti Mahmud, Project Coordinator for all the advice and support received while working on this final year report.

Nik Nurain binti Che Ismail
