ACKNOWLEDGEMENT

This research study would not have been accomplished without the help, support and guideline from everyone who deserve an appreciation. Therefore, I am using this opportunity to express my greatest attitude to some respected persons who supported me throughout my research study.

First and foremost, I am deeply indebted to my research advisor, Madam Khalilah Binti Ibrahim for her invaluable guidance, continuous encouragement and meticulous care towards me throughout my research study. Moreover, I am thankful for the adequate consultation that she has spent time for me in order to ensure the smooth journey in my research study. Besides that, I would like to thank to Dr Nur Melissa Binti Mohammad Faisal Wee for her enthusiasm and encouragement throughout my research study.

Special thanks to my parents for their continuous support in completing my research study. Not to forget, my friends who willingly help to contribute their knowledge and ideas when I was in need of some.

Last but not least, thank you to everyone who supported me directly and indirectly and have encouraged me to proceed in right earnest.

ABSTRACT

The purpose of the research is to identify whether the internal factors such as entrepreneurial competency, marketing capability, financial resources, technology usage, and knowledge sharing were related in business success among SMEs in Kuala Lumpur. The data was collected among 190 respondents from the total SMEs in Kuala Lumpur. Simple random sampling technique and area sampling has been used as a sampling technique. The data collected then key in using SPSS (Statistical Package for Social Science) to analyse all the data gathered through the questionnaire. Several analysis have been done by using the SPSS such as reliability analysis, frequency distribution, descriptive and multiple regression. Based on the data obtained, only one independent variable (financial resources) has positive relationship with the business success of SMEs in Kuala Lumpur.
