ACKNOWLEDGEMENT

IN THE NAME OF ALLAH THE MOST GRACIOUS AND THE MOST MERCIFUL

Alhamdulillah, all praise to Almighty Allah S.W.T, the most merciful and most benevolent forgiving me strength and patience in completing this project paper. I would like to thank and gratitude to my lecturers, Madam Siti NurulHuda Bt Ibrahim and Prof Madya Dr. Halimahton Binti Borhan, for all their advices, time, and support in guide me to complete this project paper. Without their guidance, I cannot complete this project very well. Their kindness in give me some idea and information are very precious and as a backbone to me. Besides that I wish to thank to my family members and classmate for all their support and encouragement during the time complete this research. Thanked for all the suggestion and encouragement either directly or indirectly. All the kindness will always remembered by me.

May Allah S.W.T. bless of us.

Thank you.

ABSTRACT

The study is carried out to investigate the determinants of bank capital and liquidity creation of banking sector in Malaysia. There are five bank specific determinants selected namely bank capital as the main independent variable and other variable that control variable is bank size, credit risk, and bank profitability. Top banks that have been chosen are namely AMBANK Group, Hong Leong Bank, CIMB Bank, RHB Bank, Public Bank and Maybank Berhad. The duration for this study are from 1999 until 2018 and the data is extract from annual report of commercial bank. Pooled OLS Model are carried out to investigate the finding from data. The results show there is two positive relationship and two negative relationship with liquidity creation of the banks.

Keywords: Liquidity Creation, Bank capital, Bank size, Bank profitability, and Credit Risk
