ACKNOWLEDGMENT

Alhamdulillah, first and foremost praises and thanks to the God, the Almighty, for His showers of blessings throughout my research work to complete successfully.

I would like to express my deep and sincere gratitude to my research advisor, Mrs. Geetha A/P Muthusamy, lecture of Faculty of Business Management, Universiti Teknologi Mara Melaka City Campus for giving me the opportunity to do this research and providing invaluable guidance throughout this research. It turned into an outstanding privilege and honor to work and study below her guidance. And also wish thank you to my second examiner Mrs. Umi Kalsum Binti Hassan in giving all her comments to improve my research.

I am extremely thankful to my parents for their love, prayers, concerned and sacrifices for instructing and preparing me for my future. Special thanks goes to my friend Fatin Adibah Binti Ariffin and Muhammad Izzul Fikri Bin Jumait for their constant encouragement to help and showing interest for me to complete this research despite they are busy to finish their research.

Besides that, I am very a great deal thankful to my supervisor her co-workers for their love, understanding, prayers and persevering with help to finish this research work. My extending thanks to the administration staff in Chancellery building who lent me their spare time to answer the questionnaire survey regardless through their busy work schedule.

Finally, my thanks to all people who have supported me in completing my research directly or indirectly.

ABSTRACT

This paper examines the factors influence Job Stress among administration staff in Universiti Teknikal Malaysia Melaka in the year 2017. The Job Stress factors has been examined under this study which are Job Demand, Workload Pressure and Role Conflict. The sample consist of a Universiti Teknikal Malaysia Melaka administrative staffs limited to Chancellery building with using convenience sampling technique. 110 questionnaire was distributed from 5 May 2017 to 16 June 2017. The result shows there is a significant relationship between Job Stress factors (Job Demand, Workload Pressure and Role Conflict) and Job Stress.
