FOREWORD

ASSOC. PROF TS. DR MOHD RASDI ZAINI
Rector
Universiti Teknologi MARA (UiTM) Cawangan Melaka

Welcome to Virtual-Melaka International Intellectual Exposition 2022 (V-MIIEEX 2022). It is an honour for me on behalf of UiTM Melaka Branch to thank all of you for joining the programme and we are proud to inform you that this is the 12th year consecutively, UiTM Melaka Branch is organizing this exposition.

V-MIIEEX 2022 is a platform to improve the commercialization collaboration among industries and communities and at the same time, we also give the opportunity to academicians and students to share ideas and increase their potential innovation products with the industries and communities through their projects. This exposition also serves as a platform to cultivate and upload the nation's innovation culture by presenting new ideas and research by young people, especially from academia, universities, college, high schools, and primary school students.

The economy and development of the country faced a challenging phase in 2021 due to the Covid-19 pandemic. We faced changes in business, education, society, and lifestyle. However, the pandemic proved to be a blessing in disguise as it somehow gave people ideas which would be beneficial to improve their lifestyle and solve problems that might occur in the future. Besides, the new digital landscape also inspires more innovation and new ideas that contribute to various activities such as business and industries. As a university that encourages the "Research, Innovation and Commercialization", this exhibition is organized to encourage more commercialization of products that are beneficial to scholars, industries, and communities to tackle such issues to improve our present and future life.

Since 2009, UiTM Melaka Branch has successfully become the organizer for this innovation exposition. We are not only successful in organizing the exposition, but I would proudly say that we have also successfully embarked on commercialized products. With the number of participants for this year's exhibition, we believe that more commercialized products will be produced in line with the theme for this year, "Road to Commercialisation".

This exposition would never happen without dedication, teamwork, and commitment. A round of applause should be given to the committee teams as the backbone of this exposition. Their hard work, effort, and time made this exposition possible.

Finally, I would like to conclude this brief remark by thanking all the participants and stakeholders for joining the exposition, we hope that this collaboration never ends here.

Thank you.

DR. NUR HAYATI BINTI ABD RAHMAN
Deputy Rector Research & Industrial Linkages
Universiti Teknologi MARA (UiTM) Cawangan Melaka

It is a great pleasure to welcome all the participants and presenters to the Virtual Melaka International Intellectual Exposition (VMIIEX 22). I am delighted that through this periodic event, we managed to bring together scholars and professionals from various fields to engage through this virtual platform where ideas and breakthrough are discovered and leveraged for commercialization potential.

Since 2009 UiTM Cawangan Melaka has held twelve Invention and Innovation Design competitions and this year we are very honoured to have the second year of VMIIEX organized in digital platform. This has proven that despite the global challenges due to the recent pandemic, it is never an issue for UiTM Melaka to continuously organize this yearly prestigious event and to support the ministry's aspiration in leveraging creativity and innovation in the new norm.

VMIIEX 22 is organized with no sole objectives of accomplishing the University's KPI but instead we are determined to make this programme as the place to help heighten commercialization collaboration in research and innovation with the industry and community through joint exhibitions from various external organizations.

Our aspiration is to also provide exposure and opportunities to academic staff as well as students from public and private universities to engage in direct excellent scholarly activities with the industry and community through activities that can be measured and assessed. As for the Research and Industrial Linkages Office of UiTM Melaka, this exhibition is seen as the platform that can encourage active collaboration and knowledge transfer with industries; objectively to support various activities that will benefit all stakeholders from the various government agencies, local and international universities, industries and communities.

Through the theme of "Road to Commercialization" this year, V-MIIEX 22 is committed to have this event as a boulevard to inspire and cultivate creativity and innovation to the numerous levels of inventors through exposure on latest technologies, astonishing ideas and creative designs with great potential to be commercialized. For this year, we proudly introduce a special category which is the "Endemic Challenge" as the provision to the government of Malaysia's goal of moving towards the endemic.

To ensure that the competing products in this exhibition is not exclusively for the purpose of competition, V-MIIEX 22 is dedicated for the commercialization of highly potential innovation products, which is attained through its active collaboration with tailored needs industries. The commercialization effort was not for income generation purpose only but it aimed to spearhead the development of quality products in line with industrial needs and community benefit.

Therefore, it is a great honour for me on behalf of the Research and Industrial Linkages Office as well as the organizing committee to have all participants in this competition and I would like to express my highest gratitude especially to the Rector of UiTM Melaka and all strategic partners and sponsors for supporting the event.

To finish, I sincerely wish VMIIEX 22 a remarkable success. I believe that this will not be the only collaboration between UiTM Melaka and the respective partners and linkages, but a beginning of a long and fruitful cooperation in future.

Thank you very much.

road to commercialisation...

WAN HASMAT WAN HASAN
Project Director V-MIIEEX 2022
Universiti Teknologi MARA (UiTM) Cawangan Melaka

Assalamualaikum and Warmest Greetings.

It gives me an enormous pleasure, on behalf of the organizing committee to welcome all participants and presenters to the Virtual -Melaka International Intellectual Exposition 2022 (VMIIEX '22) with the theme "Road to Commercialisation". We are honoured and glad to welcome all participants to this biennial event.

This is the second time that we have organized this biennial event virtually. V-MIIEEX 22 is an innovation competition, in which, innovation products, ideas and systems related to various science and technological fields are exhibited as a solution for the presented problems.

V-MIIEEX22 expectantly will be a platform that gathers experts from academies, scientists, and researchers, locally and internationally, to contribute towards the growth of scientific and technological knowledge in each participant's specialisation and expertise.

The competition also serves as a platform to give fresh exposure to the various level of inventors, as well as to encourage the culture of innovation design focused on latest technologies and related to new norms technologies and inventions due to COVID-19.

V-MIIEEX 22 is also hoped to be an avenue for gathering and disseminating the latest knowledge on ideas and acquisition of innovation among the participants. It is hoped that the competition will be able to open the mind of the participants towards latest technologies and design. It is also in line with the government's aspiration to encourage innovation activities in Malaysia.

As a final note, I would like to congratulate my fellow committee members for their tremendous effort, which have been critical to the event's success. In addition, I would like to thank our co-organizer, event sponsors and supporters. Optimistically, we wish that all new knowledge that is discovered, invented, or innovated will drive towards our future sustainability.

Thank you.

ABOUT V-MIIEEX

The world after COVID-19 is unlikely to return to the world that was. Despite the challenging pace during the pandemic, the strong rebound is expecting in this exciting year 2022. Malaysia is welcoming the great prospects ahead with positive impact on the country's economy and development. Hence, the hope for greater opportunities motivates for more creative thinkers to come up with innovative ideas that can be put forward to be harnessed to overcome similar problems in the future. V-MIIEEx 2022 is one of these platforms which contribute relevant ideas that could help communities of all walks of life cope with this pandemic.

UiTM has identified research, innovation, and commercialization to be among the core components and strategic effort towards becoming a well-known and prominent university. Aside from realizing this goal, with these components and efforts, fostering the development of knowledge, generating financial stability of the university, and producing knowledgeable academicians are also potentially achievable.

By having invention and innovation competition yearly, UiTM Cawangan Melaka is confident that it could further enhance creative and innovative abilities among staff and students. In support of the government notion which upholds the importance of innovation, UiTM Cawangan Melaka has taken the initiative of organising the Virtual Melaka International Intellectual Exposition (V-MIIEEx).

In instigating and nurturing the continuous culture of inventing and innovating, this event is an ideal platform for lecturers, administrative staff, students, and the public to showcase and commercialize their products or prototypes as well as novel ideas. The first IID which was held nationally in UiTM Cawangan Melaka in 2009, has successfully gathered and displayed more than 37 inventions and innovations. Accordingly, to continue this strong passion towards inventing and innovating, the IID competition should be continued and celebrated.

With that, the Division of Research and Industrial Linkages will be organising its 12th IID competition, the Virtual - Melaka International Intellectual Exposition (V-MIIEEx 2022) with the theme, 'Road To Commercialisation'. V-MIIEEx 2022 hopes to welcome 200 competing products to be showcased and commercialized, at the same time, attract attention of related and matching industry.

Objectives

1. Encourage and instill passion towards inventing and innovating among UiTM Cawangan Melaka staff, students and academicians of local and international higher education institutions;
2. Highlight distinguished talents of skillful inventors and exhibit intellectual products, inventions and innovations among local and private tertiary institutions, government and private agencies, including international participants;
3. Become an effective Business Matching platform for participating research products, matching industries and partnering government agencies;
4. Recognise, inspire and promote invention and innovation products to be patented and commercialized;
5. Increase passion towards inventing and innovating through research and boost interests of government and non-government agencies to obtain consultancy services from a line up experts of higher education institutions and UiTM Cawangan Melaka.

Automatic Hanging Cloth

Abstract

Automatic Hanging Cloth is produced to deal with the problem of masses to dry clothes. This problem will mostly apply to married couples who are busy at work. Erratic weather causes clothes to fall into rain if the weather is rainy on that day. Sun-dried clothes will get wet and cause a damp smell on the clothes. Due to the difficulties encountered, this Automatic Hanging Cloth was formed. This type of hanging cloth is suitable for use everywhere and is suitable for the middle class and superiors. This automatic jam suspension project works to keep the user's shirt in good condition even when it rains. The results of this research are design suggestions, concepts and functional diversity in the design of suspensions to create the use of clothing suspensions that are more convenient, fast, comfortable and easy to use.

Keyword: Automatic Hanging Cloth, Weather, Workers

1. INTRODUCTION

Malaysia is a country on the equator. So, with that, our country receives hot and humid weather (rain) throughout the year. The weather forecast is difficult to predict because the weather in our country is only hot and rainy. Then it can rain at any time, unexpectedly. Many Malaysians have a career and are busy with tasks outside the home, such as at work or the office. While at home, they still have to do daily activities such as washing clothes. They need to dry the clothes outside the house to ensure that they are exposed to sunlight and wind so that they dry quickly and do not smell musty. Clothes take quite a long time to dry completely. The problem here is when it rains and the clothes are hanging. For working households, of course, this is a problem for them. Judging from the problems, we then built an automatic hanging cloth project, i.e., the automatic hanging cloth can be moved automatically to the shade when it rains. This happens with the help of rain control devices/sensors available on the suspension. The sensitivity of this device to rain is able to turn on the motor switch to pull clothes into the shade. In addition, the low installation cost makes this device affordable for every family, whether they are low or middle income. In addition, users do not have to worry if there is damage to the suspension because the materials are very easily available on the market and users can afford to repair it themselves because it only involves a simple circuit. In terms of space, the use of this suspension can save space because its position can be modified according to the suitability of the space. This model can be modified to save space. The prototype shown is only one model of choice. In the future, it can be further developed in terms of its design.

2. OBJECTIVE

The Automatic Hanging Cloth was created to detect the light and the suspension will come out in the sun as well as detect rainwater and the suspension goes under the roof again. It was also created to help those who are busy working to make it easier for them to work without getting worries about their cloth. The automatic hanging clothe also aims to attract people for using the automatic hanging cloth.

3. NOVELTY & INVENTIVENESS

Automatic Hanging Cloth is developed to help working people. It is a problem for people to dry clothes, especially for husbands and wives who are busy working, because of the unpredictable weather, it is possible that the clothes will be exposed to rain if it rains on that day. If it rains the dried clothes will get wet and will cause a damp smell on the clothes. Other than that, the individual person who has to go working, studying and go out to go anywhere and not in time to back home, so that, their cloth with destroyed when its touched with the rain.

4. PRACTICALITY & USEFULLNESS

Due to that problem, an Automatic hanging cloth was formed. This will probably solve their problem; it is very suitable for use anywhere such as outdoors and so on. It also can save manpower by washing all clothes that are exposed to rain again. Furthermore, it can save time for people who busy working so that they do not have to worry about lifting clothes that are dried, especially during the rainy season.

The main purpose of this product is to automatically move the suspension and can also manually follow the detector that was working at that time. The device will detect light and water so that the motor in the suspension will work. When the detector is working properly and all flows flow to the motor well the functionality of this suspension project will work well.

5. CONCLUSION

In the conclusion, with well-organized and up-to-date financial records, an automatic hanging cloth can be created. Automatic hanging clothes is a great benefit to small businesses since it allows them to keep track of their transactions without having to purchase an accounting system. With the affordable price automatic hanging clothes can give the benefit to the people. Other than that, we believe that automatic hanging clothes is a friendly user especially for the people always busy of their life. So that, we believe that automatic hanging clothes can help people to make easier life because of work.
