ASSOC. PROF TS. DR MOHD RASDI ZAINI Rector Universiti Teknologi MARA (UiTM) Cawangan Melaka

Welcome to Virtual-Melaka International Intellectual Exposition 2022 (V-MIIEX 2022). It is an honour for me on behalf of UiTM Melaka Branch to thank all of you for joining the programme and we are proud to inform you that this is the 12th year consecutively, UiTM Melaka Branch is organizing this exposition.

V-MIIEX 2022 is a platform to improve the commercialization collaboration among industries and communities and at the same time, we also give the opportunity to academicians and students to share ideas and increase their potential innovation products with the industries and communities through their projects. This exposition also serves as a platform to cultivate and upload the nation's innovation culture by presenting new ideas and research by young people, especially from academia, universities, college, high schools, and primary school students.

The economy and development of the country faced a challenging phase in 2021 due to the Covid-19 pandemic. We faced changes in business, education, society, and lifestyle. However, the pandemic proved to be a blessing in disguise as it somehow gave people ideas which would be beneficial to improve their lifestyle and solve problems that might occur in the future. Besides, the new digital landscape also inspires more innovation and new ideas that contribute to various activities such as business and industries. As a university that encourages the "Research, Innovation and Commercialization", this exhibition is organized to encourage more commercialization of products that are beneficial to scholars, industries, and communities to tackle such issues to improve our present and future life.

Since 2009, UiTM Melaka Branch has successfully become the organizer for this innovation exposition. We are not only successful in organizing the exposition, but I would proudly say that we have also successfully embarked on commercialized products. With the number of participants for this year's exhibition, we believe that more commercialized products will be produced in line with the theme for this year, "Road to Commercialisation".

This exposition would never happen without dedication, teamwork, and commitment. A round of applause should be given to the committee teams as the backbone of this exposition. Their hard work, effort, and time made this exposition possible.

Finally, I would like to conclude this brief remark by thanking all the participants and stakeholders for joining the exposition, we hope that this collaboration never ends here.

Thank you.

road to commercialisation ...

DR. NUR HAYATI BINTI ABD RAHMAN
Deputy Rector Research & Industrial Linkages
Universiti Teknologi MARA (UiTM) Cawangan Melaka

It is a great pleasure to welcome all the participants and presenters to the Virtual Melaka International Intellectual Exposition (VMIIEX 22). I am delighted that through this periodic event, we managed to bring together scholars and professionals from various fields to engage through this virtual platform where ideas and breakthrough are discovered and leveraged for commercialization potential.

Since 2009 UiTM Cawangan Melaka has held twelve Invention and Innovation Design competitions and this year we are very honoured to have the second year of VMIIEX organized in digital platform. This has proven that despite the global challenges due to the recent pandemic, it is never an issue for UiTM Melaka to continuously organize this yearly prestigious event and to support the ministry's aspiration in leveraging creativity and innovation in the new norm.

VMIIEX 22 is organized with no sole objectives of accomplishing the University's KPI but instead we are determined to make this programme as the place to help heighten commercialization collaboration in research and innovation with the industry and community through joint exhibitions from various external organizations.

Our aspiration is to also provide exposure and opportunities to academic staff as well as students from public and private universities to engage in direct excellent scholarly activities with the industry and community through activities that can be measured and assessed. As for the Research and Industrial Linkages Office of UiTM Melaka, this exhibition is seen as the platform that can encourage active collaboration and knowledge transfer with industries; objectively to support various activities that will benefit all stakeholders from the various government agencies, local and international universities, industries and communities.

Through the theme of "Road to Commercialization" this year, V-MIIEX 22 is committed to have this event as a boulevard to inspire and cultivate creativity and innovation to the numerous levels of inventors through exposure on latest technologies, astonishing ideas and creative designs with great potential to be commercialized. For this year, we proudly introduce a special category which is the "Endemic Challenge" as the provision to the government of Malaysia's goal of moving towards the endemic.

To ensure that the competing products in this exhibition is not exclusively for the purpose of competition, V-MIIEX 22 is dedicated for the commercialization of highly potential innovation products, which is attained through its active collaboration with tailored needs industries. The commercialization effort was not for income generation purpose only but it aimed to spearhead the development of quality products in line with industrial needs and community benefit.

Therefore, it is a great honour for me on behalf of the Research and Industrial Linkages Office as well as the organizing committee to have all participants in this competition and I would like to express my highest gratitude especially to the Rector of UiTM Melaka and all strategic partners and sponsors for supporting the event.

To finish, I sincerely wish VMIIEX 22 a remarkable success. I believe that this will not be the only collaboration between UiTM Melaka and the respective partners and linkages, but a beginning of a long and fruitful cooperation in future.

Thank you very much.

roal to commercialisation

WAN HASMAT WAN HASAN Project Director V-MIIEX 2022 Universiti Teknologi MARA (UiTM) Cawangan Melaka

Assalamualaikum and Warmest Greetings.

It gives me an enormous pleasure, on behalf of the organizing committee to welcome all participants and presenters to the Virtual -Melaka International Intellectual Exposition 2022 (VMIIEX '22) with the theme "Road to Commercialisation". We are honoured and glad to welcome all participants to this biennial event.

This is the second time that we have organized this biennial event virtually. V-MIIEX 22 is an innovation competition, in which, innovation products, ideas and systems related to various science and technological fields are exhibited as a solution for the presented problems.

V-MIIEX22 expectantly will be a platform that gathers experts from academies, scientists, and researchers, locally and internationally, to contribute towards the growth of scientific and technological knowledge in each participant's specialisation and expertise.

The competition also serves as a platform to give fresh exposure to the various level of inventors, as well as to encourage the culture of innovation design focused on latest technologies and related to new norms technologies and inventions due to COVID-19.

V-MIIEX 22 is also hoped to be an avenue for gathering and disseminating the latest knowledge on ideas and acquisition of innovation among the participants. It is hoped that the competition will be able to open the mind of the participants towards latest technologies and design. It is also in line with the government's aspiration to encourage innovation activities in Malaysia.

As a final note, I would like to congratulate my fellow committee members for their tremendous effort, which have been critical to the event's success. In addition, I would like to thank our co-organizer, event sponsors and supporters. Optimistically, we wish that all new knowledge that is discovered, invented, or innovated will drive towards our future sustainability.

Thank you.

The world after COVID-19 is unlikely to return to the world that was. Despite the challenging pace during the pandemic, the strong rebound is expecting in this exciting year 2022. Malaysia is welcoming the great prospects ahead with positive impact on the country's economy and development. Hence, the hope for greater opportunities motivates for more creative thinkers to come up with innovative ideas that can be put forward to be harnessed to overcome similar problems in the future. V-MIIEx 2022 is one of these platforms which contribute relevant ideas that could help communities of all walks of life cope with this pandemic.

UiTM has identified research, innovation, and commercialization to be among the core components and strategic effort towards becoming a well-known and prominent university. Aside from realizing this goal, with these components and efforts, fostering the development of knowledge, generating financial stability of the university, and producing knowledgeable academicians are also potentially achievable.

By having invention and innovation competition yearly, UiTM Cawangan Melaka is confident that it could further enhance creative and innovative abilities among staff and students. In support of the government notion which upholds the importance of innovation, UiTM Cawangan Melaka has taken the initiative of organising the Virtual Melaka International Intellectual Exposition (V-MIIEx).

In instigating and nurturing the continuous culture of inventing and innovating, this event is an ideal platform for lecturers, administrative staff, students, and the public to showcase and commercialize their products or prototypes as well as novel ideas. The first IID which was held nationally in UiTM Cawangan Melaka in 2009, has successfully gathered and displayed more than 37 inventions and innovations. Accordingly, to continue this strong passion towards inventing and innovating, the IID competition should be continued and celebrated.

With that, the Division of Research and Industrial Linkages will be organising its 12th IID competition, the Virtual - Melaka International Intellectual Exposition (V-MIIEx 2022) with the theme, 'Road To Commercialisation'. V-MIIEx 2022 hopes to welcome 200 competing products to be showcased and commercialized, at the same time, attract attention of related and matching industry.

Objectives

- 1. Encourage and instill passion towards inventing and innovating among UiTM Cawangan Melaka staff, students and academicians of local and international higher education institutions;
- 2. Highlight distinguished talents of skillful inventors and exhibit intellectual products, inventions and innovations among local and private tertiary institutions, government and private agencies, including international participants;
- 3. Become an effective Business Matching platform for participating research products, matching industries and partnering government agencies;
- 4. Recognise, inspire and promote invention and innovation products to be patented and commercialized;
- 5. Increase passion towards inventing and innovating through research and boost interests of government and non-government agencies to obtain consultancy services from a line up experts of higher education institutions and UiTM Cawangan Melaka.

Coders in Early-Stage Flashcard

Abstract

Basic knowledge is very important for everything because it will always determine how strong something can be. No matter how far someone has been, this basic knowledge must be kept in mind in order to perform any task where related knowledge is required. Therefore, a Coders in Early-Stage flashcard is a tangible product that will help beginners and students of computer science who learn programming to master basic programming knowledge because it has to be mastered in order to perform the next level thereafter. Interactive interfaces will boost users' mood to study and get to understand the context rapidly since the information is simple and straight to the point. This summary of the innovation has two objectives, to discuss the ability of the Coders in Early-Stage flashcard to students and discuss the contribution of the flashcard. This programming flashcard is an innovative product as it is compact enough to be used and it also will assist and guide users in developing their skills of programming since users will easily bring it wherever they want and study to revise and learn anytime. Programming books or modules usually come with heavy and big sizes; thus, this Coders in Early-Stage flashcard is an innovative solution for students. Lastly, depending on the size of this flashcard, the price can be guaranteed to not be costly and make users tend to buy this product.

Keywords: Flashcard, early education, Coding.

1. INTRODUCTION

A lot of us know that Computer Sciences students UiTM Melaka will learn a lot of programming languages as their main focus. It could be hard for the students to master each programming language. They also need a strong basic knowledge that they learnt in Semester 1 so it could be easier for them to study other programming languages in the next semesters. A flash card is a small card that contains information that can help students in their studies. Therefore, Coders in Early-Stage Flashcard is the product that we want to introduce where it can be used by Computer Sciences students. Each of the flashcard will contain a question, answer and brief explanation. This flashcard can help the students to have better understanding about programming and they can strengthen their basic knowledge.

2. OBJECTIVE

There are several main objectives of this flashcard business. Firstly, provide learning tools that are able to help Computer Science students to understand the subjects they take because as everyone is aware, Computer Science courses are not easy as they have to learn a lot of

programming languages with different software to develop a systematic system or database. Next, increase the interest of Computer Science students UiTM Melaka with what they are learning so that they will understand the subject better. In addition, this flashcard is also made as a quick reference for students because this flashcard is made with a size that is very suitable to be carried anywhere and very effective for last minute study during quizzes or tests. This flashcard is also very effective to increase students' understanding of the programming language learned because this flashcard is very complete with notes and short questions in accordance with the latest syllabus compared to other books which are very complicated and hard to understand.

3. NOVELTY & INVENTIVENESS

This Coders in Early-Stage Flashcard is produced with simple notes of programming based on the syllabus of semester 1 Diploma in Computer Science. Unlike other programming notes which are written in thick books or modules, this flashcard is compact with brief and complete notes for students to master the programming subject. The notes are created straight to the point without using too many words for the readers to understand the context. Therefore, students do not need to make their own notes to summarize all the important content because the flashcards are based on valuable notes itself. It is also completed by interactive design which makes it more appealing to be used. Not to mention, the size of flashcards is very small which makes it portable for students to bring it anywhere.

4. PRACTICALITY & USEFULLNESS

This flashcard is a learning aid intended to assist students interested in the fundamentals of programming knowledge, mainly for Diploma in Computer Science students UiTM Melaka. A complete flashcard with compact notes with questions and answers makes it convenient for students to carry anywhere. Furthermore, a flashcard is an excellent technique for learning and memorization.

5. CONCLUSION

In conclusion, it is very suitable and helpful for Computer Science students. One of the reasons is that it is easy to use and can fit in a student pocket. And also, easy to use anytime and anywhere. Because of the size of this card, it can be carried anywhere. After that, we can promote to students more easily and get profits and very affordable prices also help students. Then, the target market is very clear which is science computer students.
