ABSTRACT

Al-Quran is the most important book in Muslims' life as it gives knowledge in many areas for the use of their daily life. Therefore, it is needed to be read properly so the meaning of the reading is correct. In addition, learning *tajwid* is a must in order to improve better reading. The main purpose of the project is to train artificial neural network (ANN) data to identify the *tajwid*. It is also trying to classify the *tajwid* based on letters and signs by defining their shape and location. Images are used as samples to be processed for the used of classification. In order to have a system which has an ability to learn, back-propagation learning algorithm is used. The results of the experiments done shows that the accurate results produced by the prototype is 20%. From the accurate results, 60% results are *Mad Asli* and 40% is *Ikhfa' Haqiqi*. From the identification of *Mad Asli*, 40% accurate results are from the letter *alif* (ا), 40% is from the letter *wau* (و) and 20% is from the letter *ya* (ي). As conclusion, it is hope that this project can be the starting point for a better learning of *tajwid*.

TABLE OF CONTENTS

CONTENT	PAGE
DECLARATION	ii
ACKNOWLEDGEMENTS	iii
ABSTRACT	iv
LIST OF TABLES	viii
LIST OF FIGURES	ix
CHAPTER 1: INTRODUCTION	
1.0 Problem Background	1
1.1 Problem Description	2
1.2 Project Objectives	3
1.3 Project Scope	3
1.4 Hardware and Software Requirements	4
CHAPTER 2: LITERATURE REVIEW	
2.0 Introduction	6
2.1 Digital Image Processing	6
2.1.1 Fundamental Steps in Digital Image Processing	7
2.1.1[a] Image Acquisition	8
2.1.1[b] Image Enhancement	8
2.1.1[c] Segmentation	9
2.1.1[d] Representation and Description	10
2.1.1[e] Object Recognition	11
2.2 Artificial Neural Networks	13
2.2.1 The Model of a Biological Neuron	13
2.2.2 The Principals of Artificial Neural Networks	15
2.2.3 Multilayer Neural Network	16

2.2.4	Back-propagation Learning Algorithm	17
2.3	Information Retrieval	18
2.3.1	Information Retrieval versus Data Retrieval	19
2.4	<i>Tajwid</i>	19
2.4.1	<i>Nun Sukun and Tarwin</i>	21
2.4.2[a]	<i>Izhar Halqi</i>	22
2.4.2[b]	<i>Idgham</i>	22
2.4.2[c]	<i>Iqlab</i>	23
2.4.2[d]	<i>Ikhfa' Haqiqi</i>	23
2.4.2	<i>Mim Sukun</i>	24
2.4.1[a]	<i>Ikhfa' Syafawi</i>	24
2.4.1[b]	<i>Idgham Mislain</i>	24
2.4.1[c]	<i>Izhar Syafawi</i>	24
2.4.3	<i>Nun and Mim Tasydid</i>	25
2.4.4	<i>Idgham</i>	25
2.4.4[a]	<i>Idgham Mutamathilain</i>	26
2.4.4[b]	<i>Idgham Mutaqaribain</i>	26
2.4.4[c]	<i>Idgham Mutajanisain</i>	26
2.4.5	<i>Mad and Qasr</i>	27
2.4.5[a]	<i>Mad Asli</i>	28
2.4.5[b]	<i>Mad Far'i</i>	29
2.5	Summary	31

CHAPTER 3: METHODOLOGY

3.0	Introduction	32
3.1	Knowledge and Image Acquisition	33
3.2	Pre-Processing	33
3.2.1	Image Normalization	33
3.2.2	Segmentation	35
3.2.3	Identify Interest of Region	38
3.3	ANN Design	39
