Mayflax has developed a service called PillPlan, which involves the personalisation and pre-sorting of long-term medications into pouches according to patients' consumption times. This service aims to improve medication adherence and reduce the risk of hospitalisation due to non-compliance with chronic illnesses. UiTM is a distinguished institution of higher learning that seeks to contribute to the advancement of knowledge and societal well-being through education, research, and community engagement.

This relationship represents a significant milestone in both parties' effort to contribute to the advancement of knowledge and societal well-being through education, research, and community engagement. As part of this collaboration, UiTM and Mayflax Sdn. Bhd. hope to develop a strategic relationship; the MoU will remain effective for two years. This memorandum entails various activities, mainly through the Faculty of Pharmacy at the UiTM Selangor Branch, Puncak Alam Campus.
