ASSOC. PROF TS. DR MOHD RASDI ZAINI Rector Universiti Teknologi MARA (UiTM) Cawangan Melaka

Welcome to Virtual-Melaka International Intellectual Exposition 2022 (V-MIIEX 2022). It is an honour for me on behalf of UiTM Melaka Branch to thank all of you for joining the programme and we are proud to inform you that this is the 12th year consecutively, UiTM Melaka Branch is organizing this exposition.

V-MIIEX 2022 is a platform to improve the commercialization collaboration among industries and communities and at the same time, we also give the opportunity to academicians and students to share ideas and increase their potential innovation products with the industries and communities through their projects. This exposition also serves as a platform to cultivate and upload the nation's innovation culture by presenting new ideas and research by young people, especially from academia, universities, college, high schools, and primary school students.

The economy and development of the country faced a challenging phase in 2021 due to the Covid-19 pandemic. We faced changes in business, education, society, and lifestyle. However, the pandemic proved to be a blessing in disguise as it somehow gave people ideas which would be beneficial to improve their lifestyle and solve problems that might occur in the future. Besides, the new digital landscape also inspires more innovation and new ideas that contribute to various activities such as business and industries. As a university that encourages the "Research, Innovation and Commercialization", this exhibition is organized to encourage more commercialization of products that are beneficial to scholars, industries, and communities to tackle such issues to improve our present and future life.

Since 2009, UiTM Melaka Branch has successfully become the organizer for this innovation exposition. We are not only successful in organizing the exposition, but I would proudly say that we have also successfully embarked on commercialized products. With the number of participants for this year's exhibition, we believe that more commercialized products will be produced in line with the theme for this year, "Road to Commercialisation".

This exposition would never happen without dedication, teamwork, and commitment. A round of applause should be given to the committee teams as the backbone of this exposition. Their hard work, effort, and time made this exposition possible.

Finally, I would like to conclude this brief remark by thanking all the participants and stakeholders for joining the exposition, we hope that this collaboration never ends here.

Thank you.

road to commercialisation ...

DR. NUR HAYATI BINTI ABD RAHMAN Deputy Rector Research & Industrial Linkages Universiti Teknologi MARA (UiTM) Cawangan Melaka

It is a great pleasure to welcome all the participants and presenters to the Virtual Melaka International Intellectual Exposition (VMIIEX 22). I am delighted that through this periodic event, we managed to bring together scholars and professionals from various fields to engage through this virtual platform where ideas and breakthrough are discovered and leveraged for commercialization potential.

Since 2009 UiTM Cawangan Melaka has held twelve Invention and Innovation Design competitions and this year we are very honoured to have the second year of VMIIEX organized in digital platform. This has proven that despite the global challenges due to the recent pandemic, it is never an issue for UiTM Melaka to continuously organize this yearly prestigious event and to support the ministry's aspiration in leveraging creativity and innovation in the new norm.

VMIEX 22 is organized with no sole objectives of accomplishing the University's KPI but instead we are determined to make this programme as the place to help heighten commercialization collaboration in research and innovation with the industry and community through joint exhibitions from various external organizations.

Our aspiration is to also provide exposure and opportunities to academic staff as well as students from public and private universities to engage in direct excellent scholarly activities with the industry and community through activities that can be measured and assessed. As for the Research and Industrial Linkages Office of UiTM Melaka, this exhibition is seen as the platform that can encourage active collaboration and knowledge transfer with industries; objectively to support various activities that will benefit all stakeholders from the various government agencies, local and international universities, industries and communities.

Through the theme of "Road to Commercialization" this year, V-MIIEX 22 is committed to have this event as a boulevard to inspire and cultivate creativity and innovation to the numerous levels of inventors through exposure on latest technologies, astonishing ideas and creative designs with great potential to be commercialized. For this year, we proudly introduce a special category which is the "Endemic Challenge" as the provision to the government of Malaysia's goal of moving towards the endemic.

To ensure that the competing products in this exhibition is not exclusively for the purpose of competition, V-MIIEX 22 is dedicated for the commercialization of highly potential innovation products, which is attained through its active collaboration with tailored needs industries. The commercialization effort was not for income generation purpose only but it aimed to spearhead the development of quality products in line with industrial needs and community benefit.

Therefore, it is a great honour for me on behalf of the Research and Industrial Linkages Office as well as the organizing committee to have all participants in this competition and I would like to express my highest gratitude especially to the Rector of UiTM Melaka and all strategic partners and sponsors for supporting the event.

To finish, I sincerely wish VMIIEX 22 a remarkable success. I believe that this will not be the only collaboration between UiTM Melaka and the respective partners and linkages, but a beginning of a long and fruitful cooperation in future.

Thank you very much.

roal to commercialisation

WAN HASMAT WAN HASAN Project Director V-MIIEX 2022 Universiti Teknologi MARA (UiTM) Cawangan Melaka

Assalamualaikum and Warmest Greetings.

It gives me an enormous pleasure, on behalf of the organizing committee to welcome all participants and presenters to the Virtual -Melaka International Intellectual Exposition 2022 (VMIIEX '22) with the theme "Road to Commercialisation". We are honoured and glad to welcome all participants to this biennial event.

This is the second time that we have organized this biennial event virtually. V-MIIEX 22 is an innovation competition, in which, innovation products, ideas and systems related to various science and technological fields are exhibited as a solution for the presented problems.

V-MIIEX22 expectantly will be a platform that gathers experts from academies, scientists, and researchers, locally and internationally, to contribute towards the growth of scientific and technological knowledge in each participant's specialisation and expertise.

The competition also serves as a platform to give fresh exposure to the various level of inventors, as well as to encourage the culture of innovation design focused on latest technologies and related to new norms technologies and inventions due to COVID-19.

V-MIIEX 22 is also hoped to be an avenue for gathering and disseminating the latest knowledge on ideas and acquisition of innovation among the participants. It is hoped that the competition will be able to open the mind of the participants towards latest technologies and design. It is also in line with the government's aspiration to encourage innovation activities in Malaysia.

As a final note, I would like to congratulate my fellow committee members for their tremendous effort, which have been critical to the event's success. In addition, I would like to thank our co-organizer, event sponsors and supporters. Optimistically, we wish that all new knowledge that is discovered, invented, or innovated will drive towards our future sustainability.

Thank you.

road to commercialization ...

The world after COVID-19 is unlikely to return to the world that was. Despite the challenging pace during the pandemic, the strong rebound is expecting in this exciting year 2022. Malaysia is welcoming the great prospects ahead with positive impact on the country's economy and development. Hence, the hope for greater opportunities motivates for more creative thinkers to come up with innovative ideas that can be put forward to be harnessed to overcome similar problems in the future. V-MIIEx 2022 is one of these platforms which contribute relevant ideas that could help communities of all walks of life cope with this pandemic.

UiTM has identified research, innovation, and commercialization to be among the core components and strategic effort towards becoming a well-known and prominent university. Aside from realizing this goal, with these components and efforts, fostering the development of knowledge, generating financial stability of the university, and producing knowledgeable academicians are also potentially achievable.

By having invention and innovation competition yearly, UiTM Cawangan Melaka is confident that it could further enhance creative and innovative abilities among staff and students. In support of the government notion which upholds the importance of innovation, UiTM Cawangan Melaka has taken the initiative of organising the Virtual Melaka International Intellectual Exposition (V-MIIEx).

In instigating and nurturing the continuous culture of inventing and innovating, this event is an ideal platform for lecturers, administrative staff, students, and the public to showcase and commercialize their products or prototypes as well as novel ideas. The first IID which was held nationally in UiTM Cawangan Melaka in 2009, has successfully gathered and displayed more than 37 inventions and innovations. Accordingly, to continue this strong passion towards inventing and innovating, the IID competition should be continued and celebrated.

With that, the Division of Research and Industrial Linkages will be organising its 12th IID competition, the Virtual - Melaka International Intellectual Exposition (V-MIIEx 2022) with the theme, 'Road To Commercialisation'. V-MIIEx 2022 hopes to welcome 200 competing products to be showcased and commercialized, at the same time, attract attention of related and matching industry.

Objectives

1. Encourage and instill passion towards inventing and innovating among UiTM Cawangan Melaka staff, students and academicians of local and international higher education institutions;

2. Highlight distinguished talents of skillful inventors and exhibit intellectual products, inventions and innovations among local and private tertiary institutions, government and private agencies, including international participants;

3. Become an effective Business Matching platform for participating research products, matching industries and partnering government agencies;

4. Recognise, inspire and promote invention and innovation products to be patented and commercialized;

5. Increase passion towards inventing and innovating through research and boost interests of government and non-government agencies to obtain consultancy services from a line up experts of higher education institutions and UiTM Cawangan Melaka.

road to commercialisation ...

Hydrobeep

Abstract

The issue of neglecting to hydrate is often looked past by certain individuals who are caught up with working which can make their body frail because of not drinking sufficient water for a person. With plastic water bottles possessing the top level of socially unsuitable single-use embellishments, reusable water bottles that are both gorgeous and practical feel like a need in this cutting-edge, hydration-fixated world. Hydrobeep is a stainless-steel water bottle, your goto eco-friendly reusable sidekick. A premium alternative for a water flask. It is vacuuminsulated and keeps cold drinks cold, hot drinks hot for hours. The opening is designed wide enough to have room for loading in ice. It is the unique combination of temperature, taste that allows Hydrobeep to deliver refreshment anytime, anywhere. It is to be made with durable prograde stainless steel that claims to not retain or transfer flavours. The material Hydrobeep is made out of provides durability against scuffing, weather and water. As it is easy to grip, sweatfree and durable, it is a necessity that it is convenient anywhere. The temperature control and visibility allow the chances of burning yourself with hot boiling water close to none. Introducing a new feature, the reasoning for its name, the bottle beeps as a precautionary warning for those who tend to forget to consume their water intake. It works as a reminder and will be effective for those who are too preoccupied with their task that they neglect their dehydrated body. There is also a USB port to charge the bottle which lasts up to 48 hours on full capacity. Perfect for those who want a chameleon of a bottle, something that adapts to almost any situation.

Keywords: Eco-friendly, Drinking, Premium, Hydrobeep, Temperature, Beeping, Alternative, Water.

1. INTRODUCTION

Water is an essential to one's health, which is why you should drink plenty of it throughout the day, as opposed to power drinks or soft drinks. Water is the only drink that can completely relieve your thirst, and it's a simple and pleasant approach to maintain your body healthy and strong. Because water is undoubtedly the most important nutrient and the only one for which a lack of it can result in death within days, understanding water measurement and requirements is critical. Water has a clear impact on daily performance as well as short- and long-term health.

2. OBJECTIVE

The temperature control and visibility make it nearly impossible to burn oneself with hot boiling water. The bottle beeps as a precautionary reminder for individuals who tend to forget to consume their water intake, which is the reason for its name. It serves as a reminder and will be useful for individuals who are so focused on their task that they forget their dehydrated body. When heated to high temperatures, BPA migrates into water held in polycarbonate plastic. Reusable aluminium bottles with an epoxy-based lining have been discovered to emit relatively high quantities of BPA into drinking water. It is hoped that the proposed water bottle which is Hydrobeep would become a safer option.

3. NOVELTY & INVENTIVENESS

Hydrobeep is a stainless-steel water bottle that is both eco-friendly and reusable. A high-end alternative to a water flask. It is vacuum-insulated and will keep cold drinks cold for hours and hot drinks hot for hours. The hole is large enough to accommodate ice loading. It is the unique combination of temperature and taste that enables Hydrobeep to provide refreshment at any time and in any place. It will be made of tough pro-grade stainless steel that is said to not retain or transfer flavours. The material used to make Hydrobeep is resistant to scuffing, weather, and water. It is necessary that it is convenient anyplace since it is easy to grip, sweat-free, and robust.

4. PRACTICALITY & USEFULNESS

This bottle is an everyday necessity that is expected to be used by everyone from all age groups. Set aside up cash from purchasing plastic water bottles that is a one-time use or isn't synthetically suggested with the possibility to leach foul-tasting or even potentially harmful chemicals into the water. Reusable containers like Hydrobeep are not secured to simply facilitating water, it could hold any beverage you like, even hot soup! Due to the quality protected material, it keeps your cold drinks as cool as it was or your new cup of steaming hot coffee as hot as it was.

5. CONCLUSION

Drinking water is an important thing that gives many benefits to our body. It helps regulate body temperature, aiding digestion and keeps the body hydrated. With Hydrobeep water bottle, it can help many people to always consume enough water every day. Hydrobeep aims to facilitate users by providing a variety of attractive functions and unique designs. This water bottle is just part of something that is much needed to help us, but it is an important part that can help make a big difference in life.
