**Cawangan Melaka**

Welcome to the Melaka International Intellectual Exposition 2024 (MIIEX '24). It is an honour for me, on behalf of UiTM Cawangan Melaka, to thank all of you for joining MIIEX '24. We are proud to inform you that this is the 13th consecutive year that UiTM Cawangan Melaka is organizing this exposition. Since 2009, UiTM Cawangan Melaka has successfully hosted this innovation exposition. Not only have we succeeded in organizing the exposition, but we have also successfully embarked on commercialized products.

2024 is a special year where MIIEX 2024 emphasizes the development of special needs. As we know, special needs indicate a limitation in a person's ability to engage in and benefit from various aspects, such as daily activities and education. Hence, with the theme "Empowering Special Needs Through Invention and Innovation," it is a platform for industries, professionals, academicians, students, and communities to share their innovative ideas and products to increase accessibility for those with special needs.

The successful implementation of MIIEX '24 is our joint success. This event was supported by the Melaka state government through YB Datuk Fairul Nizam bin Roslan, the EXCO of Science, Technology, Innovation, and Digital Communication. I also want to express my

gratitude to Universitas Negeri Padang, Indonesia, Universitas Muhammadiyah, Makassar, Indonesia, the International Association of Economic and Businesses (IAEB), Universiti Sains Islam Malaysia, Ibnu Umri Maktum Research Center (UMMI), USIM, and The Southeast Asia Minister of Education Organization Regional Centre for Special Educational Needs (SEAMEO SEN) as our co-collaborators for MIIEX 2024.

The collaboration from various parties in MIIEX '24 is a platform that will improve cooperation and interweaving among industries, professionals, academicians, students, and communities in shaping their potential in developing innovation products. This exposition also serves as a platform to cultivate and uphold the nation's innovation culture by presenting new ideas and research by young people, especially from academia and universities. Indirectly, MIIEX '24 will encourage all inventors towards empowering Science, Technology, Engineering, and Mathematics (STEM), especially in primary and secondary schools.

The new digital landscape also inspires more innovation and new ideas that contribute to various activities, such as business and industries. As a university that encourages "Research and Innovation," we aim to foster more innovative products that benefit scholars, industries, and communities, addressing issues to improve our present and future life.

This exposition would never happen without dedication, teamwork, and commitment. A round of applause should be given to the committee teams, who are the backbone of this exposition. Their hard work, effort, and time made this exposition possible.

Finally, I would like to conclude this brief remark by thanking all the participants and stakeholders for joining the exposition. We hope that this collaboration never ends here.

Thank you.

## **FOREWORD BY THE DEPUTY RECTOR (RESEARCH & INDUSTRIAL LINKAGES)**

**Associate Professor. Dr. Nur Hayati binti Abd Rahman**

**Deputy Rector (Research & Industrial Linkages), Universiti Teknologi MARA (UiTM) Cawangan Melaka**

With much passion and privilege, let me warmly welcome all of you to the Melaka International Innovation Exhibition (MIIEEX), UiTM Cawangan Melaka's flagship event. I firmly believe that events such as these demonstrate the gradual evolution of this platform in terms of its significance and its governing principles within the sphere of learning and the broader scholarly society.

The theme for this year, "Empowering Special Needs Through Invention and Innovation," strongly connects to our mission of using research and technology to make a positive impact on the world we live in. Besides enforcing the message of diversity, this theme also reaffirms our focus on creating products to improve the lives of people with disabilities (PWDs). Such innovations are vital as only through focused constructive changes can society become more sensitive to the needs of all members.

MIIEEX allows researchers, students, and industry professionals to come together, share their innovative research, and develop viable research partnerships. It has been great to see the enthusiasm of the participants and the efforts they put into their projects, which can offer various social and economic benefits. This is why one can state that MIIEEX is a great

opportunity for creating connections between the academic environment and industry, facilitating the implementation of innovative and promising projects.

Finally, I would like to express my sincere appreciation to all the members and supporters of the organizing committee, all the participants, sponsors, and everyone involved in preparing this event. I want to express my gratitude for your commitment and involvement, as the success of MIIEX and the development of an active culture of innovation in our university and beyond is partly owed to your support.

Thank you

## **FOREWORD BY THE PROJECT DIRECTOR**

**Dr Zulkefli bin Muhamad Hanapiyah**

**Senior Lecturer**

Assalamualaikum and Warmest Greetings,

It gives me a great pleasure, on behalf of the organizing committee, to welcome all participants and speakers to the Melaka International Intellectual Exposition 2024 (MIIEX '24) with the theme "Empowering Special Needs Through Invention and Innovation." We are honoured and pleased to welcome all participants to this biennial event.

MIIEX '24 is a platform that gathers experts from local and international industries, academia, scientists, researchers, and the community to contribute to the advancement of scientific and technological knowledge. This knowledge helps develop disruptive innovation products that improve daily activities for businesses and the community, especially those with special needs.

MIIEX '24 provides an atmosphere for inventors of all levels to gain new exposure and collaborate. Indirectly, this promotes a collaborative and innovative culture that focuses on cutting-edge technologies and new standards in technology and creativity.

MIIEX '24 is anticipated to serve as an arena for participants to acquire and disseminate revolutionary information on ideas and innovation. It is intended that the competition will expose the contestants' minds to the latest technologies and designs, aligning with the government's goal of encouraging innovation in Malaysia.

Finally, I want to compliment my fellow committee members on their amazing efforts, which were vital to the event's success. In addition, I want to thank our co-organizers, event sponsors, and participants. Optimistically, we hope that all new knowledge discovered, invented, or innovated will lead us toward future sustainability.

Thank you.

## **ABOUT MIIEX'24**

MIIEX'24 is an innovation competition annually organised by UiTM Melaka with the intention to bring together ideas and inspiration that could fit in for commercialization needs.

This event creates a platform for researchers to establish networking, partnership and opportunities to collaborate with industries.

## **OBJECTIVES**

1. Encourage and instil passion towards inventing and innovating among UiTM Cawangan Melaka staff, students and academicians of local and international higher education institutions;
2. Highlight distinguished talents of skilful inventors and exhibit intellectual products, inventions and innovations among local and private tertiary institutions, government and private agencies, including international participants;
3. Become an effective Business Matching platform for participating research products, matching industries and partnering government agencies;
4. Recognise, inspire and promote invention and innovation products to be patented and commercialized;
5. Increase passion towards inventing and innovating through research and boost interests of government and non-government agencies to obtain consultancy services from a line up experts of higher education institutions and UiTM Cawangan Melaka.

### **Abstract**

Individuals facing challenges in executing precise actions due to limited hand mobility encounter significant obstacles in independently applying cosmetics, impacting their confidence and self-expression. Traditional cosmetic tools require delicate gripping and dexterity, presenting barriers for those with disabilities or motor impairments. Existing solutions often lack precision or are cumbersome, leaving a gap in accessible beauty routines. This paper proposes an innovative solution: an AI robotic makeup applicator integrating advanced algorithms and robotic technology to revolutionize cosmetic application for individuals with limited hand function. The device offers precise and effortless makeup application through a user-friendly interface, empowering users to customize their preferences and desired looks. By eliminating the struggle with traditional tools, the AI robotic makeup applicator ensures precision even for intricate tasks like eyeliner or lipstick application, fostering independence in beauty routines. Through advanced sensors and computer vision technology, the device adapts to individual needs and preferences over time, enhancing accessibility and inclusivity in beauty practices. While the proposed framework lacks demonstrated results, it holds promise for addressing the unmet needs of individuals with limited hand mobility, urging further research and development efforts in this area.

**Keyword: AI robotic makeup applicator, user-friendly interface, advanced algorithms, robotic technology**

## 1. INTRODUCTION

Artificial intelligence (AI)-powered makeup applicators are the specialty of Ai Beauty Co., which specialises in their creation and marketing. Our flagship product offers a flawless cosmetics application experience for people of all abilities by fusing ergonomic design with cutting-edge AI algorithms. "Ergonomic design" is the process of creating machinery, processes, or products that are easy for people to operate, pleasant, and effective. Our industry, the fast changing beauty and cosmetics sector, is driven by innovation and inclusivity. In a crowded market, we can differentiate ourselves thanks to our distinct position at the cutting edge of technology. Our makeup applicators now include AI to meet the increasing need for accessible features and customised beauty solutions.

## 2. OBJECTIVE

Ai Beauty Co have their objective to develop an artificial intelligence makeup robot applicator or machine specifically tailored for individuals with hand disabilities, aiming to provide effortless and precise makeup application, enhance accessibility to beauty products and routines, and promote self-confidence and independence in personal grooming.

## 3. NOVELTY & INVENTIVENESS

Ai Beauty Co. is reinventing makeup for individuals with physical disabilities using creative, new concepts. Making makeup application easier than ever, with robotic makeup air brush that connected with screen vision and Ai technology with advance sensors for face detection and makeup selection are revolutionizing the beauty industry. Additionally, everyone will feel

included and confident thanks to our user-friendly textures and labels. By using this creative approach, we're encouraging everyone to express themselves and not just making cosmetics.

#### **4. PRACTICALLY & USEFULLNESS**

Cutting-edge makeup tools, such as those incorporating airbrush technology, AI analysis of facial features and preferences, and advanced sensors, are revolutionizing cosmetics for individuals with disabilities. By seamlessly adapting to users' needs and providing personalized application, these tools enhance confidence and inclusivity in beauty routines. Furthermore, the integration of screen vision technology allows for real-time feedback and automatic selection of suitable products, ensuring a flawless and tailored makeup experience. Ultimately, these innovations demonstrate that everyone, regardless of circumstances, can enjoy and benefit from cosmetics.

#### **5. CONCLUSION**

To summarize, innovative makeup products designed for people with disabilities provide practical solutions to common challenges, making makeup application easier and more accessible." By providing specialized tools and simple features, these products enable users to express themselves boldly and independently. With a variety of solutions accessible, everyone may find what works best for them, promoting inclusivity and appreciating diversity in the beauty industry.
